

**BECOME 10X: BOOSTING YOUR  
PERFORMANCE AT WORK**

# Tool #1

Want a research assistant  
in your team who works 24/7?

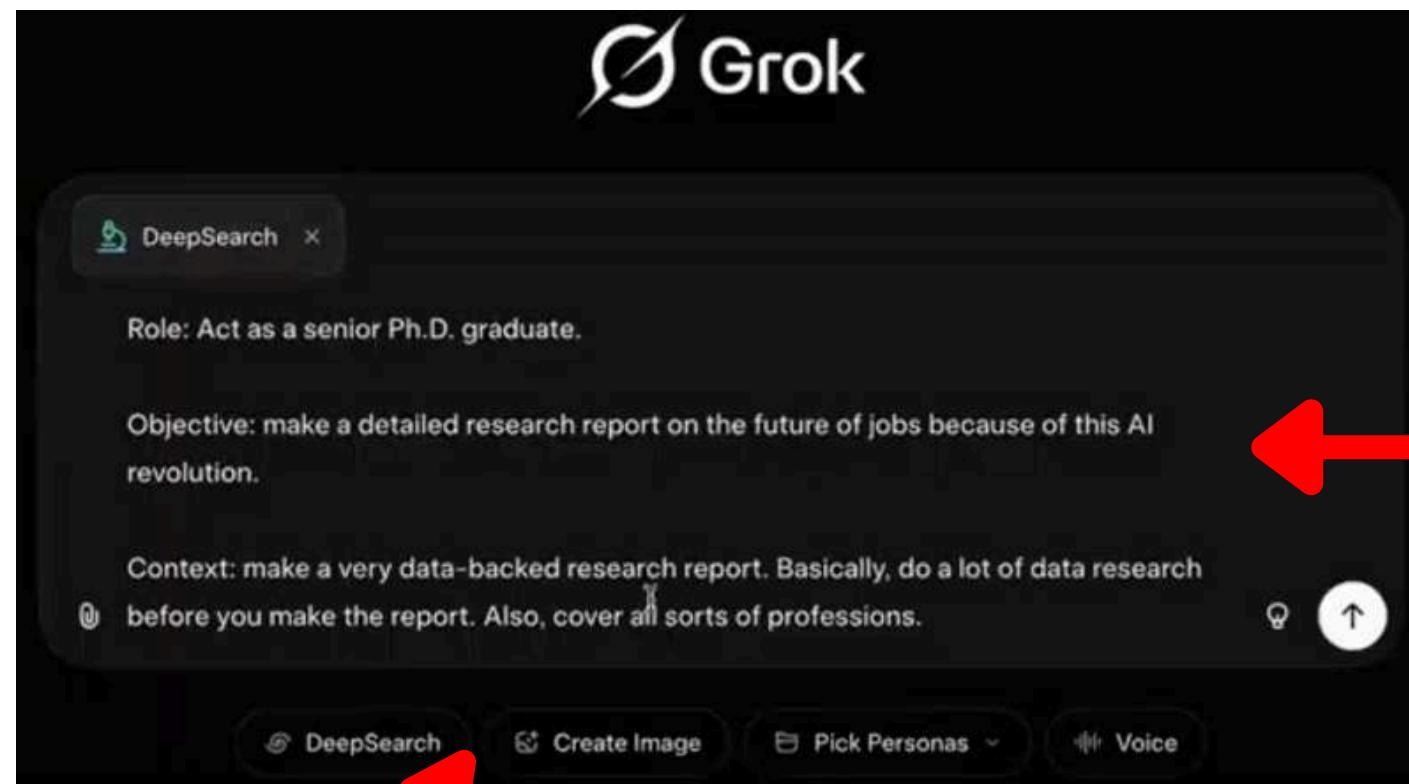

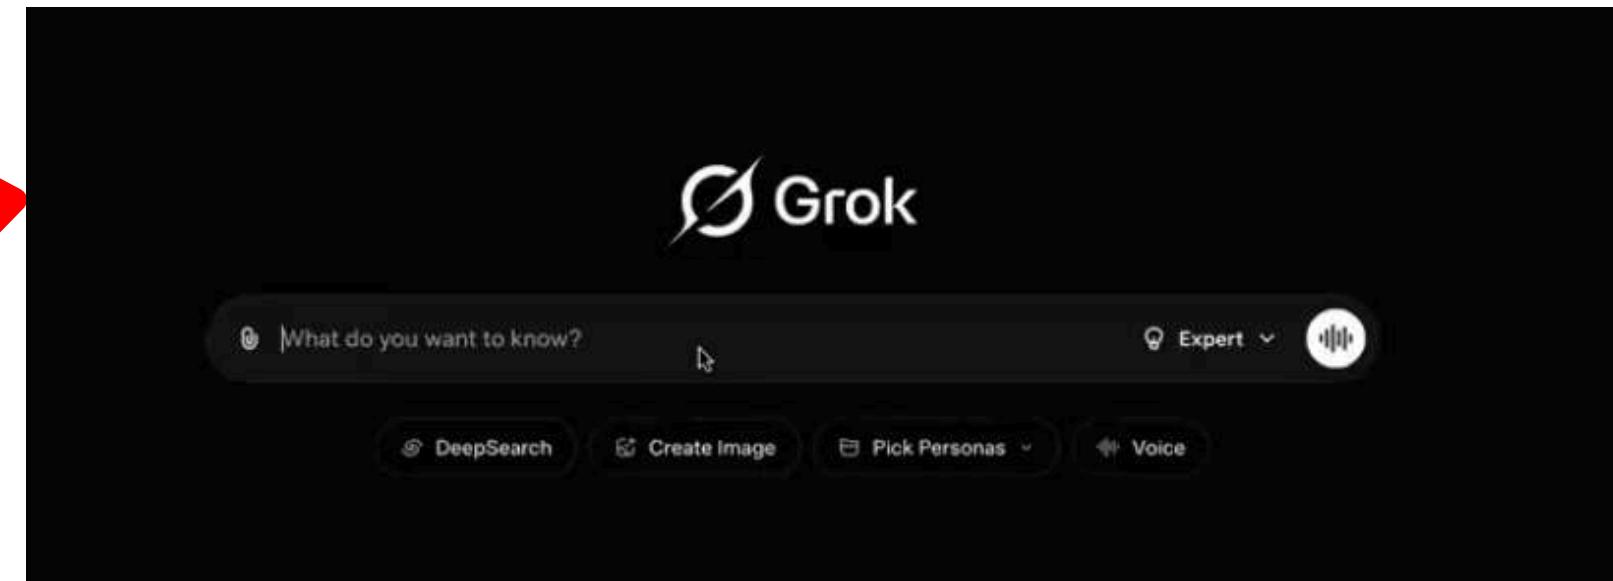

# Grok

## APPLICATION:

- Deep Search to make consultant level reports

**Step 1: Go to Grok.com**

**Step 2: Give it a customized prompt according to your need by typing in the box or through text to speech button.**

**Step 3: Enable the deep research option here**

**What is a prompt:** In AI, a prompt is the input provided to a model to elicit a specific response

Role: Act as a senior Ph.D. graduate.

Objective: make a detailed research report on the future of jobs because of this AI revolution.

Context: make a very data-backed research report. Basically, do a lot of data research before you make the report. Also, cover all sorts of professions.

Key Insights on AI's Impact on the Future of Jobs

- Net Positive but Uneven Transformation: Research suggests AI will create more jobs than it displaces by 2030, with a projected net gain of 78 million roles globally, though 92 million may be lost—highlighting the need for reskilling to manage 22% labor market churn. It seems likely that

It will start generating the detailed and structured output

At the end, you will get a detailed report as per your requirement, also with all the references and its links.

Impacts Across Professions				
Profession Category	Example Roles	Net Job Growth/Decline (%)	Key AI Impact	Vulnerability Level
Tech/AI Specialists	AI/ML Engineers, Data Scientists	+41% to +82%	Augmentation & Creation	Low (High Demand)
Administrative/Clerical	Data Entry Clerks, Admin Assistants	-21% to -40%	High Automation	High
Healthcare Providers	Radiologists, Nurses	+3% (Annual Growth)	Task Augmentation	Medium
Educators	Teachers, Mentors	Stable to +10%	Admin Relief	Low
Creative Professionals	Designers, Writers	-10% to +20% (Shift to Oversight)	Tool Integration	Medium-High

Too lazy to type?

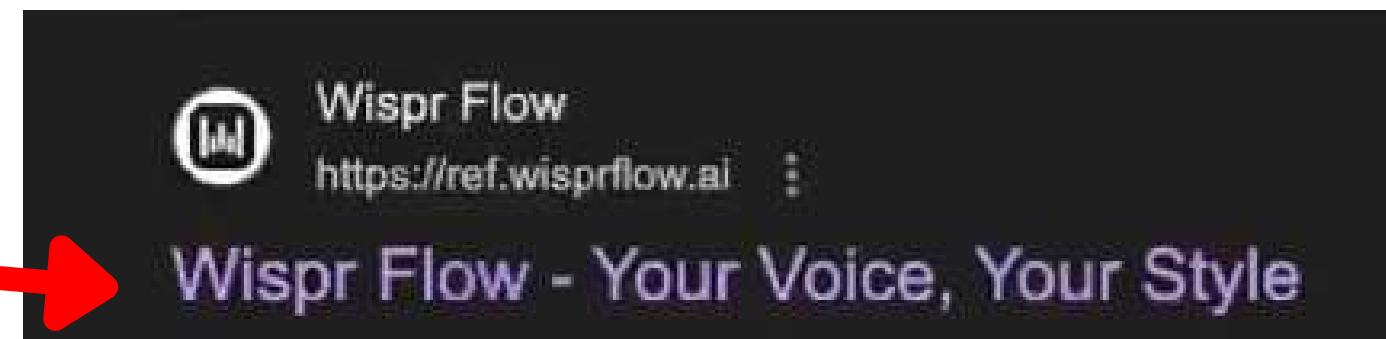

# Wispr Flow AI

## APPLICATION:

- No more typos. No more distractions. Just effortless, voice-powered writing. Write effortlessly with AI-powered dictation.

**Step 1: Go to [wisprflow.ai](https://ref.wisprflow.ai)**

A screenshot of the Wispr Flow website. The header features a dark green bar with the text 'Never leave the intern in charge for BFCM.' and a link 'Unlock Deal >'. Below this is a navigation bar with links for 'Flow', 'Product', 'Individuals', 'Business', 'Pricing', 'About', 'Research', and a purple button 'Download for macOS'. The main visual is a large, light-colored graphic with the text 'Don't type, just speak' in a large serif font. Below it, a subtitle reads 'The voice-to-text AI that turns speech into clear, polished writing in every app.' A purple 'Download for macOS' button is positioned below the subtitle. The footer contains some small text and a 'Saved name' button.

**Step 2: Download it from here  
— available for Windows,  
macOS, and mobile devices.**

**Click the trigger button and speak - your words will be captured by the system.**

## Tool #2

Want to analyse a scanned PDF or a file  
and find insights from it?

# Would you like to analyze stocks like Warren Buffet?

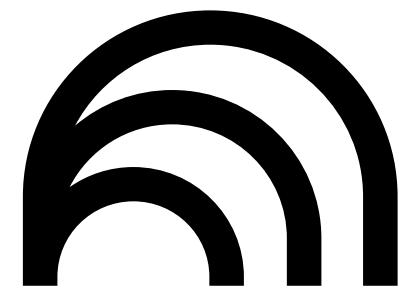

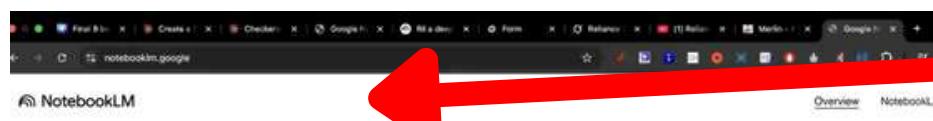

be10x

# Notebook LM

## APPLICATION:

- Summaries any PDF, scanned document, book, link, article at click of a button. Generate PPTs, Infographics, Podcasts, etc

 NotebookLM

# Step 1: Go to NotebookLM

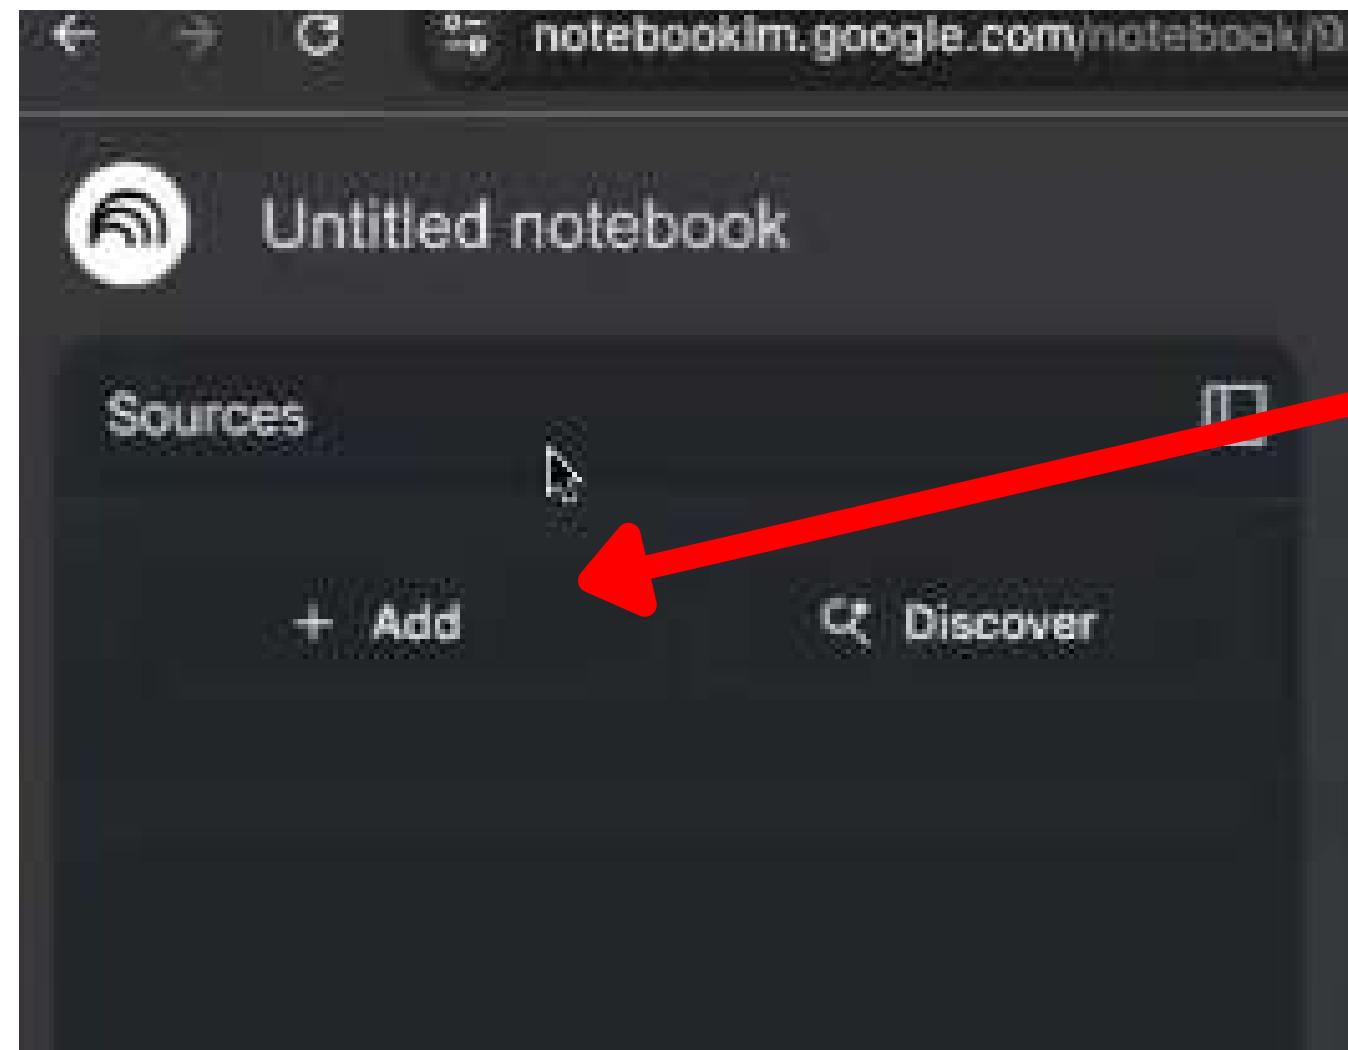

Think **Smarter**,  
Not Harder

The ultimate tool for understanding the information that matters most to you, built with Gemini 2.0.

Try NotebookLM

You will get a interface like this

A screenshot of the NotebookLM interface. At the top, there is a navigation bar with 'Untitled notebook' and icons for Share, Settings, and Profile. A large red arrow points down from the 'Step 1' title to the top of this bar. The interface is divided into three main sections: 'Sources' on the left, 'Chat' in the center, and 'Studio' on the right. The 'Sources' section has a 'Sources' tab, a 'Discover' button, and a 'Add' button. It also contains a note about saved sources and a 'Upload a source' button. The 'Chat' section has a 'Deep Dive conversation' card with 'Customize' and 'Generate' buttons. The 'Studio' section has a 'Audio Overview' card with a 'Notes' tab, a 'Study guide' button, a 'Briefing doc' button, a 'FAQ' button, and a 'Timeline' button. A note at the bottom says 'Saved notes will appear here'.

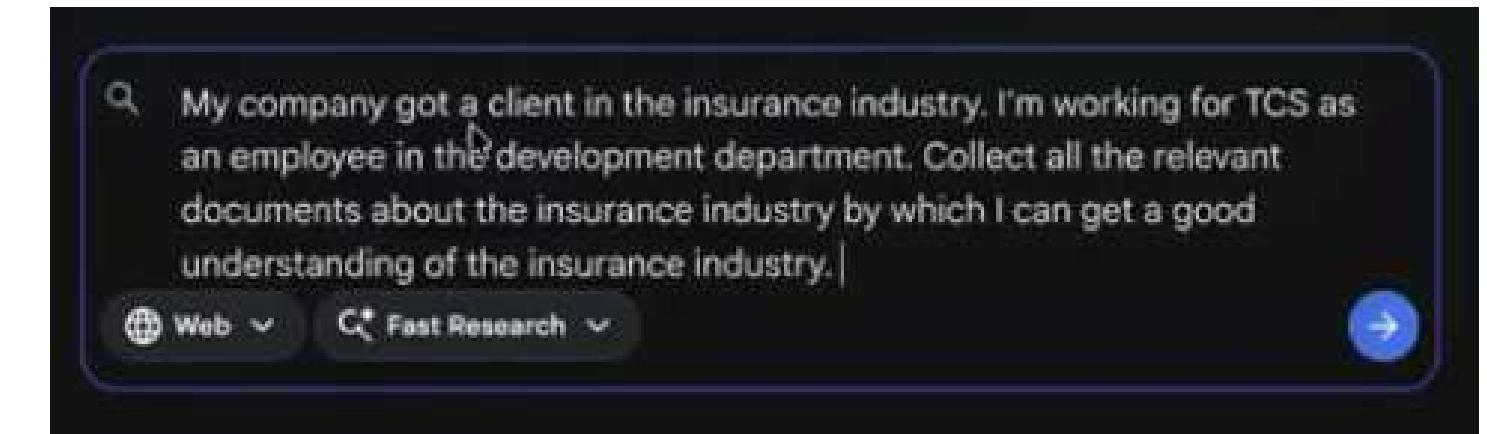

You can add your sources(multiple) from here

A screenshot of the 'Add sources' dialog box. It starts with a brief description: 'Sources let NotebookLM base its responses on the information that matters most to you. (Examples: marketing plans, course reading, research notes, meeting transcripts, sales documents, etc.)'. Below this is a large input field with a blue upload icon and the text 'Upload sources. Drag &amp; drop or choose file to upload'. A red arrow points from the text 'You can upload multiple type of content like document, audio, video, YT link, Copied text and more' to this input field. At the bottom of the dialog are several options: 'Google Drive', 'Google Docs', 'Google Slides', 'Link', 'Website', 'YouTube', 'Paste text', and 'Copied text'.

You can upload multiple type of content like document, audio, video, YT link, Copied text and more

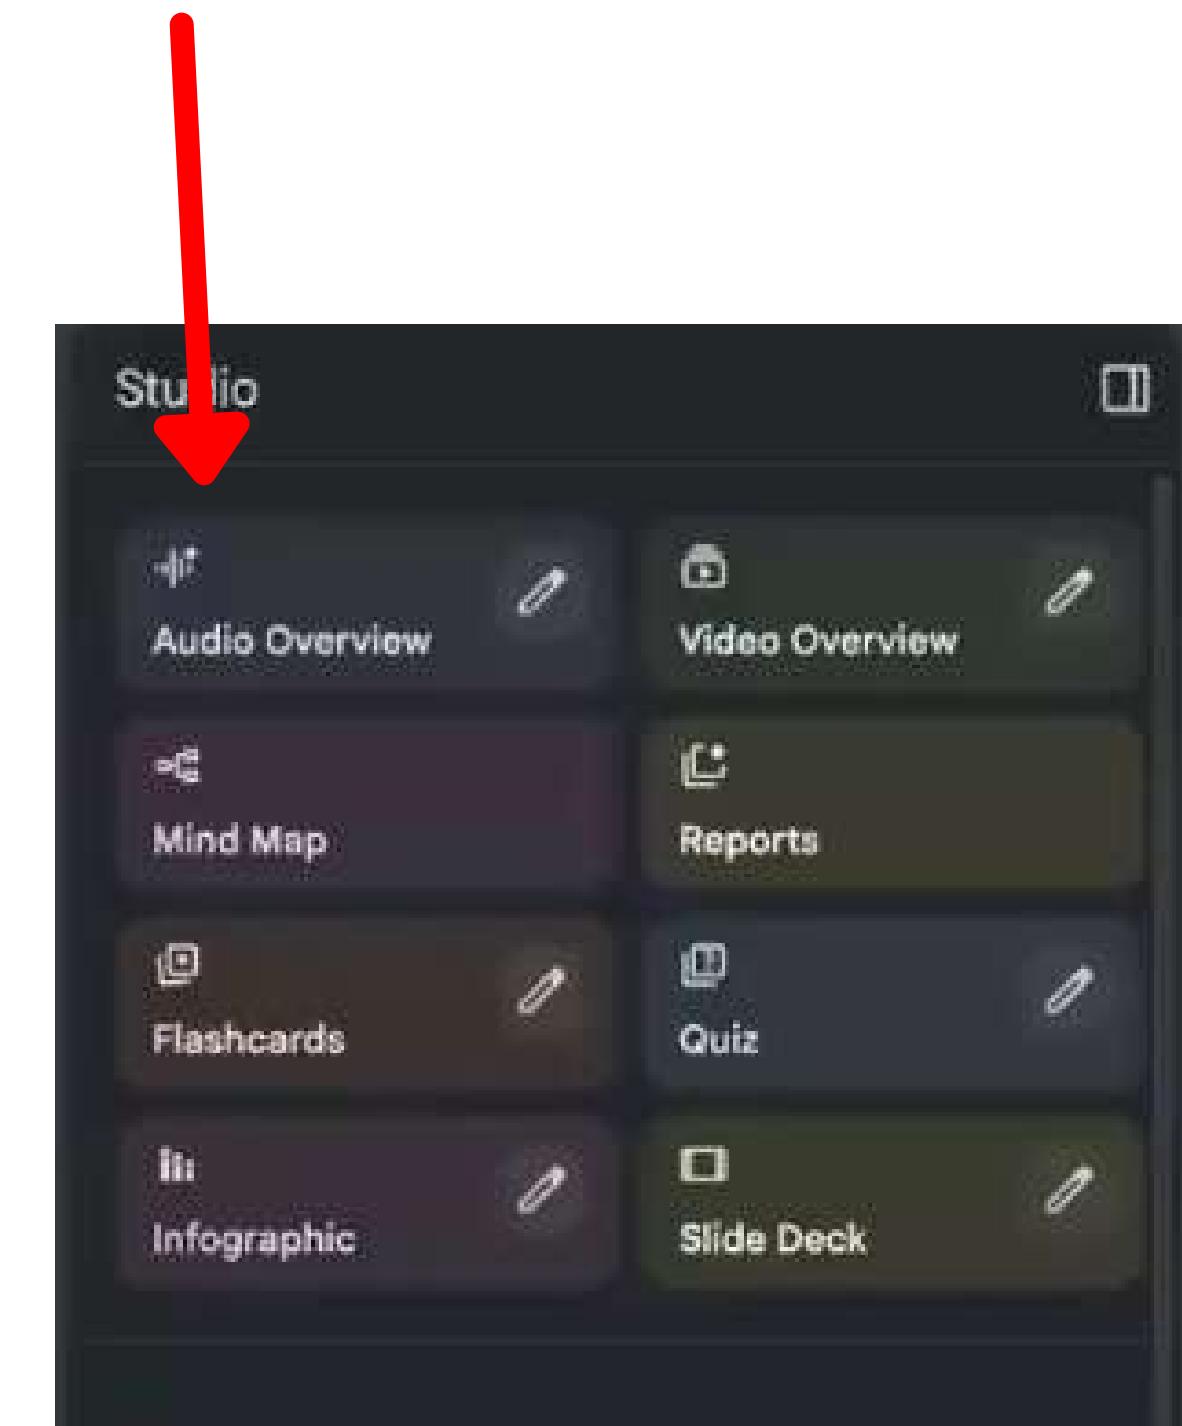

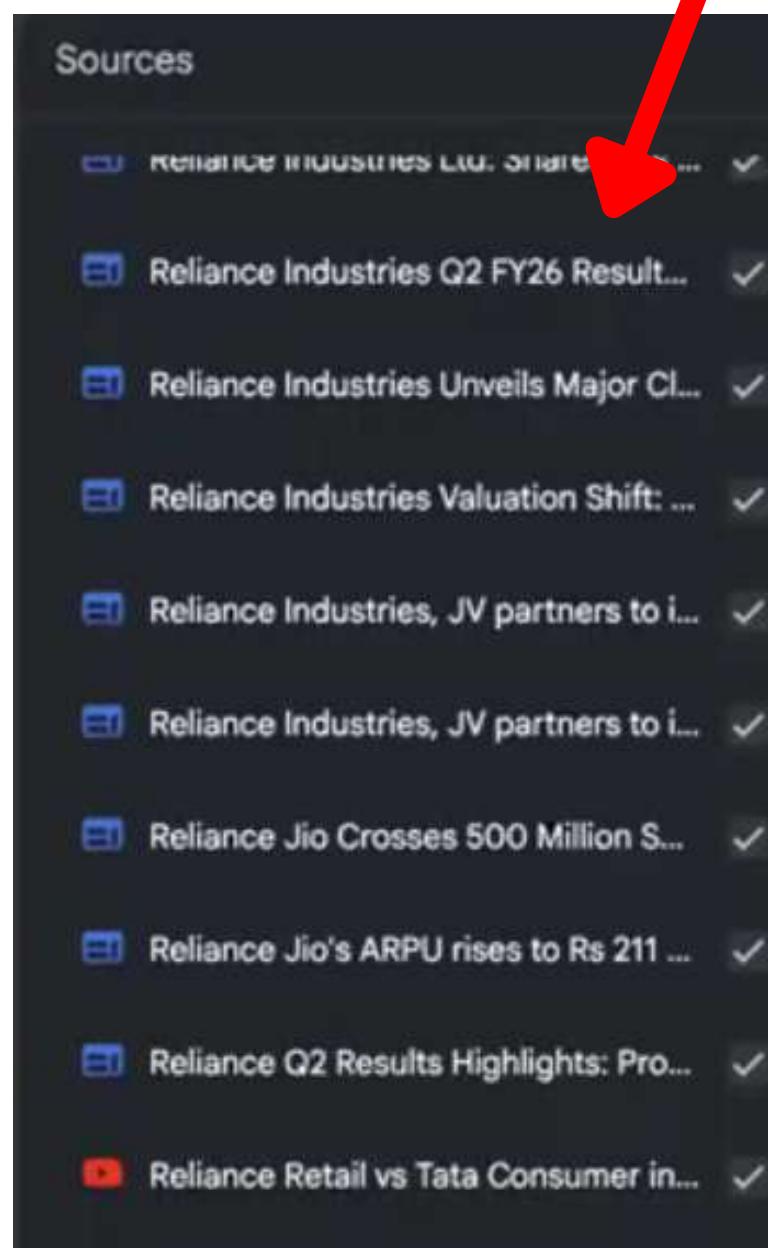

You can also search the file by providing a prompt based on your needs and start a chat; it will find all the relevant documents.

A screenshot of a "Source Discovery" interface. At the top left is the title "Sources > Source Discovery". Below it is a search bar containing the text "My company got a client in the insurance industry. I'm work...". A descriptive text follows: "This selection of resources provides a foundational understanding of insurance principles, technical life cycles, and current industry trends." Underneath is a section titled "Select all sources" with a checked checkbox. A list of resources is shown with checkboxes next to each item:

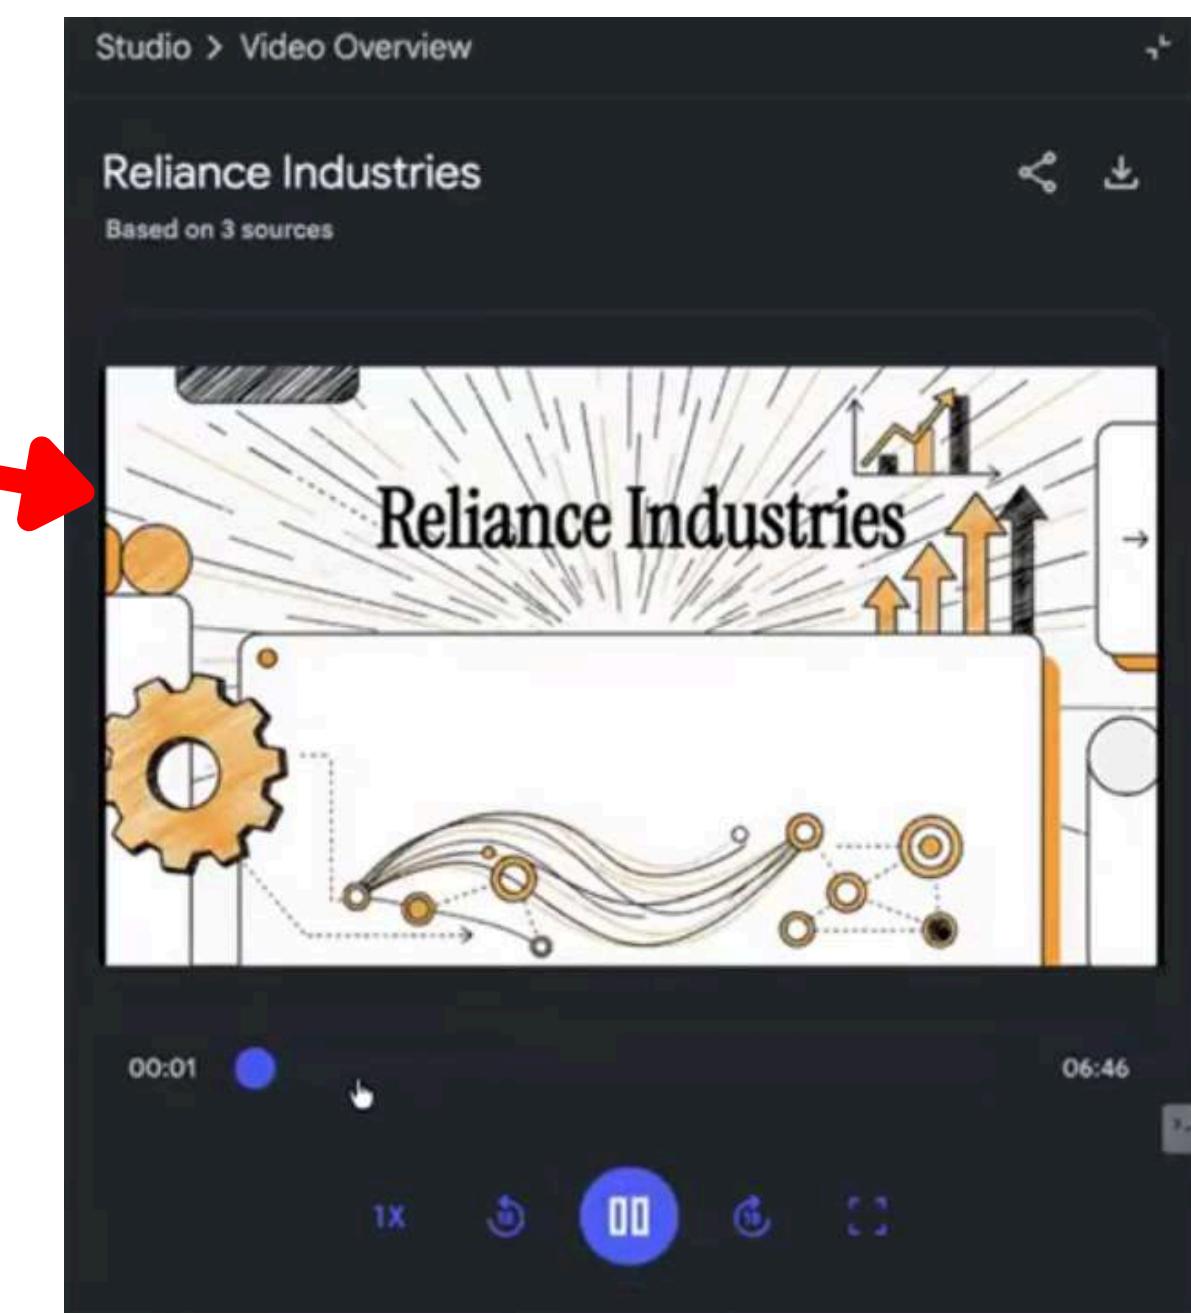

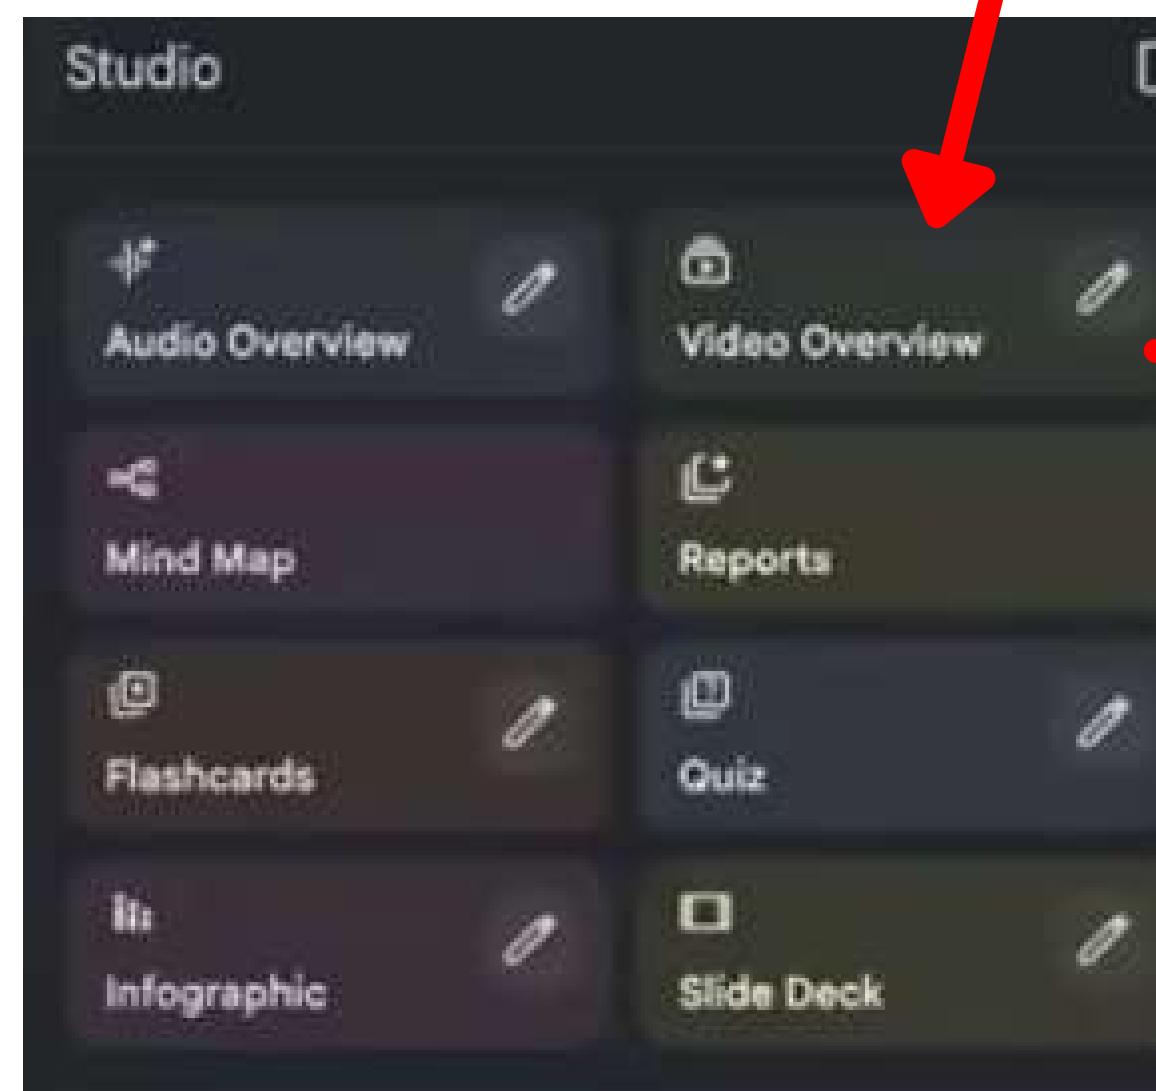

- Insurance Business Operations - Tata Consultancy Services  Directly explains how your employer, TCS, supports insurance o...
- Principles and practice of insurance - National Open ...  Comprehensive introductory guide to core insurance principles ...
- BriteCore Educational Series: What is an Insurance Policy Lif...  Explains the technical lifecycle stages from application to claims.
- Insurance Industry Value Chain: Deep Dive - Rlevy.com  Breaks down the industry value chain for business analysis.
- Difference Between Life Insurance and Non-Life Insurance ...  Clarifies the fundamental differences between life and non-life ...

Describe what you want to search here; the system will search for it and then display the results.

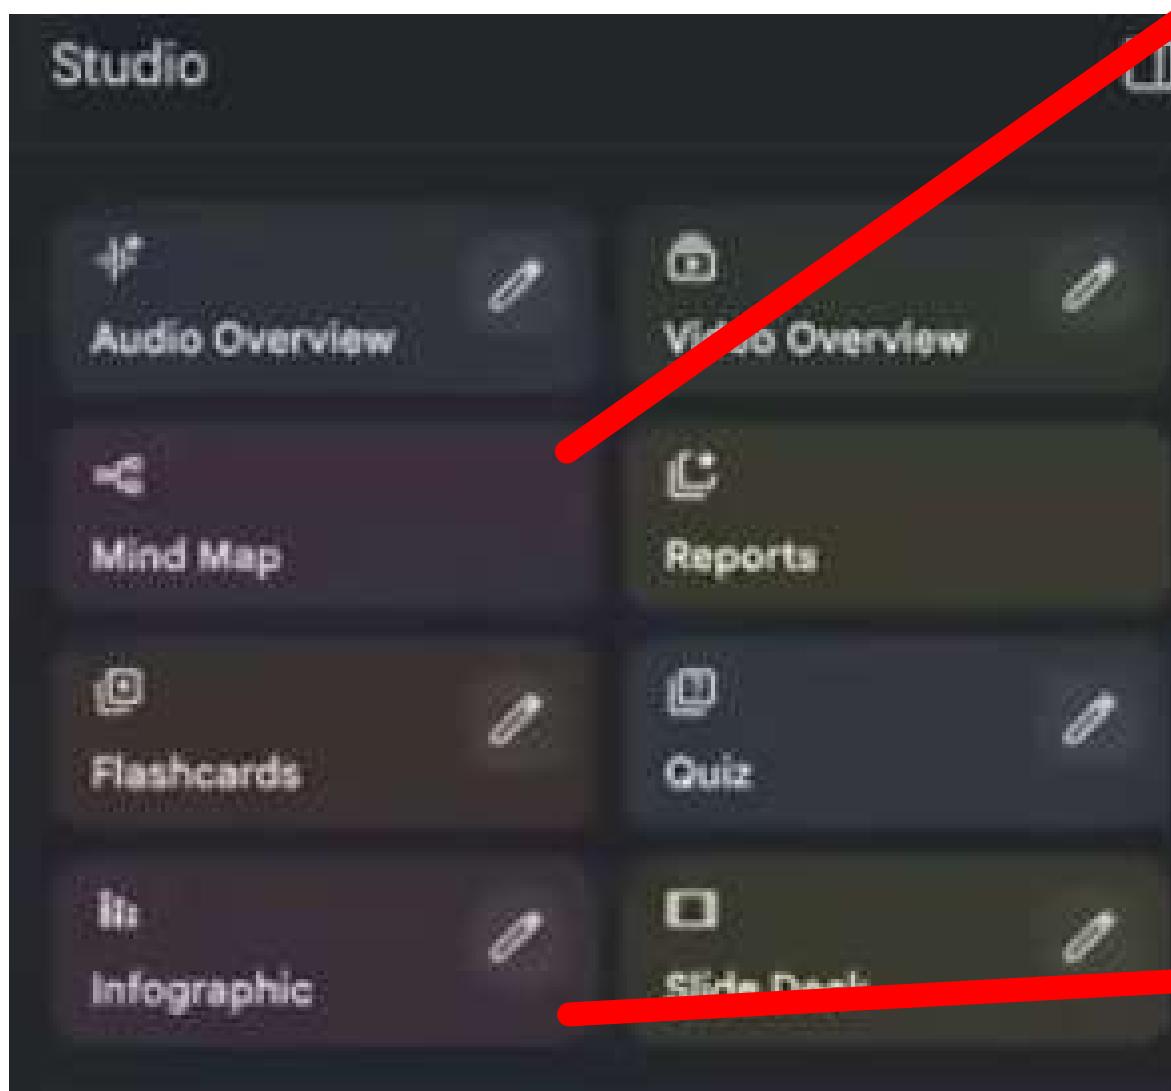

Any document you upload here can be turned into a podcast — just click  
“Audio Overview,”

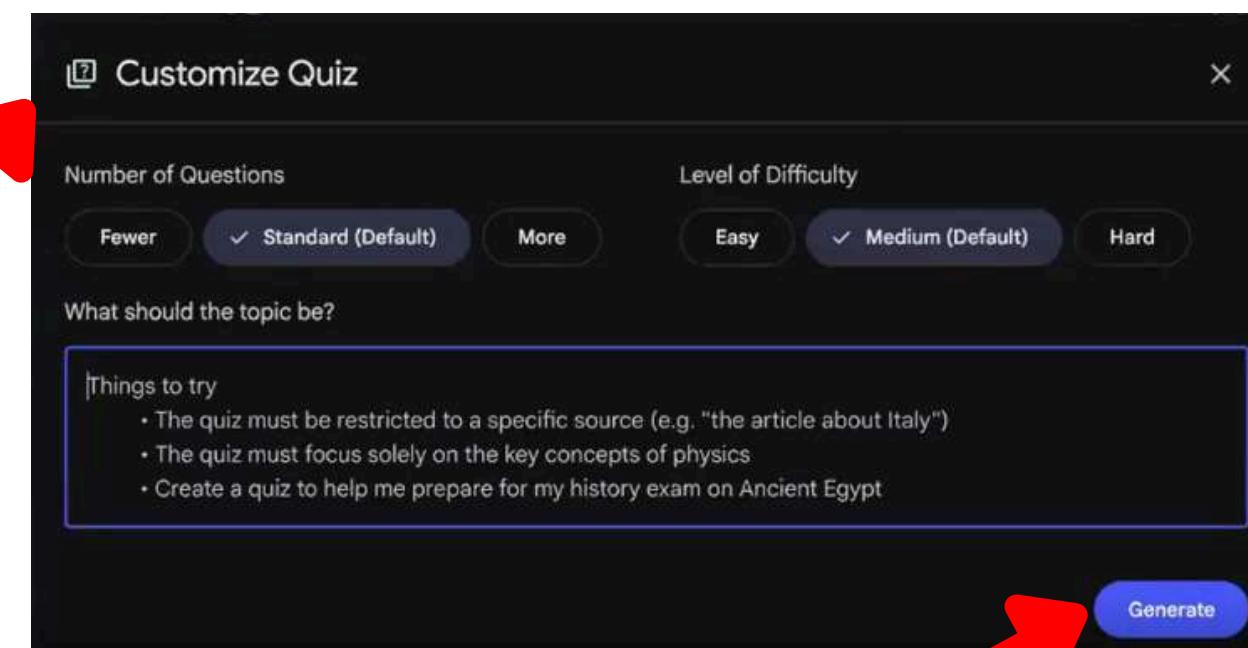

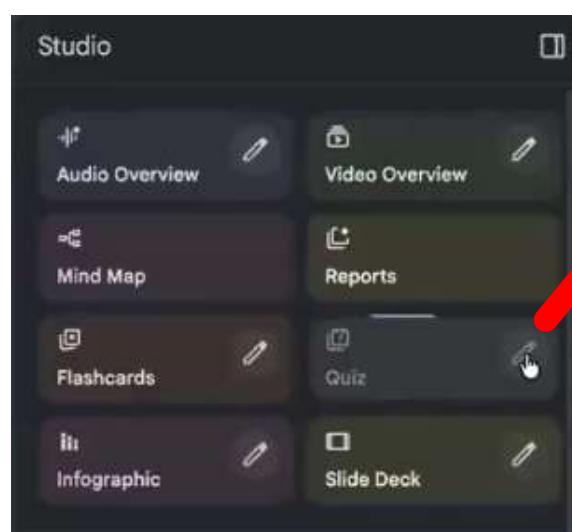

**Click “Video Overview” to watch a video about the uploaded resource.**

# You can also create mind maps, and infographics.

You can also create quizzes and customize them by adjusting the difficulty and the number of questions.

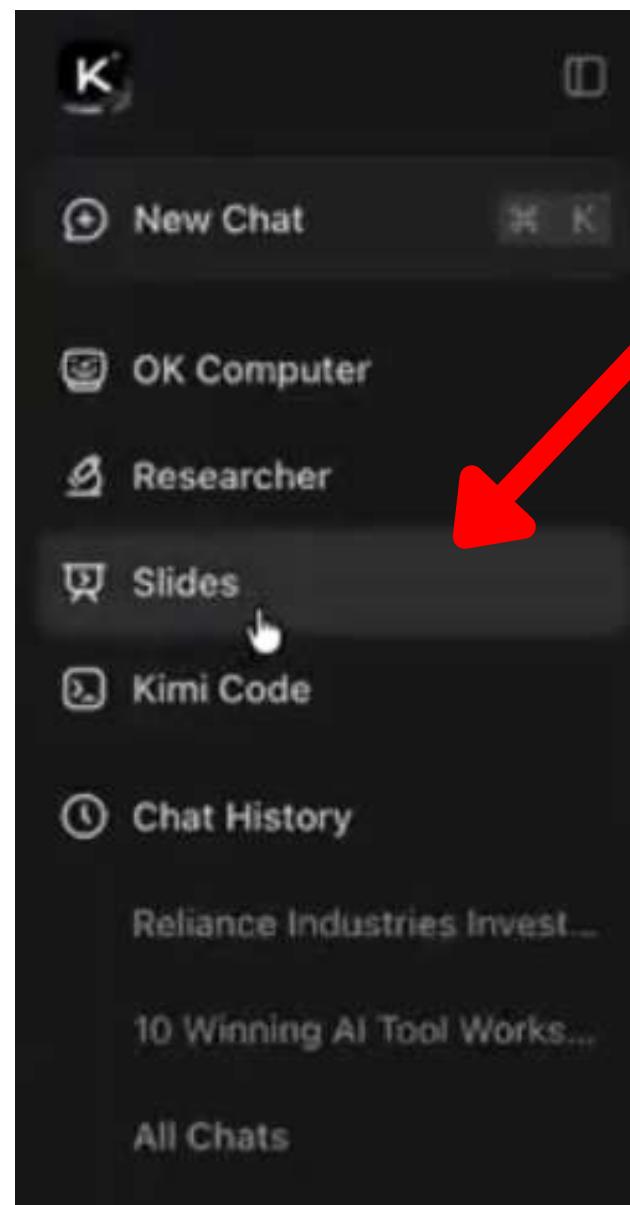

Click the “Generate” button, and the quiz will be created.

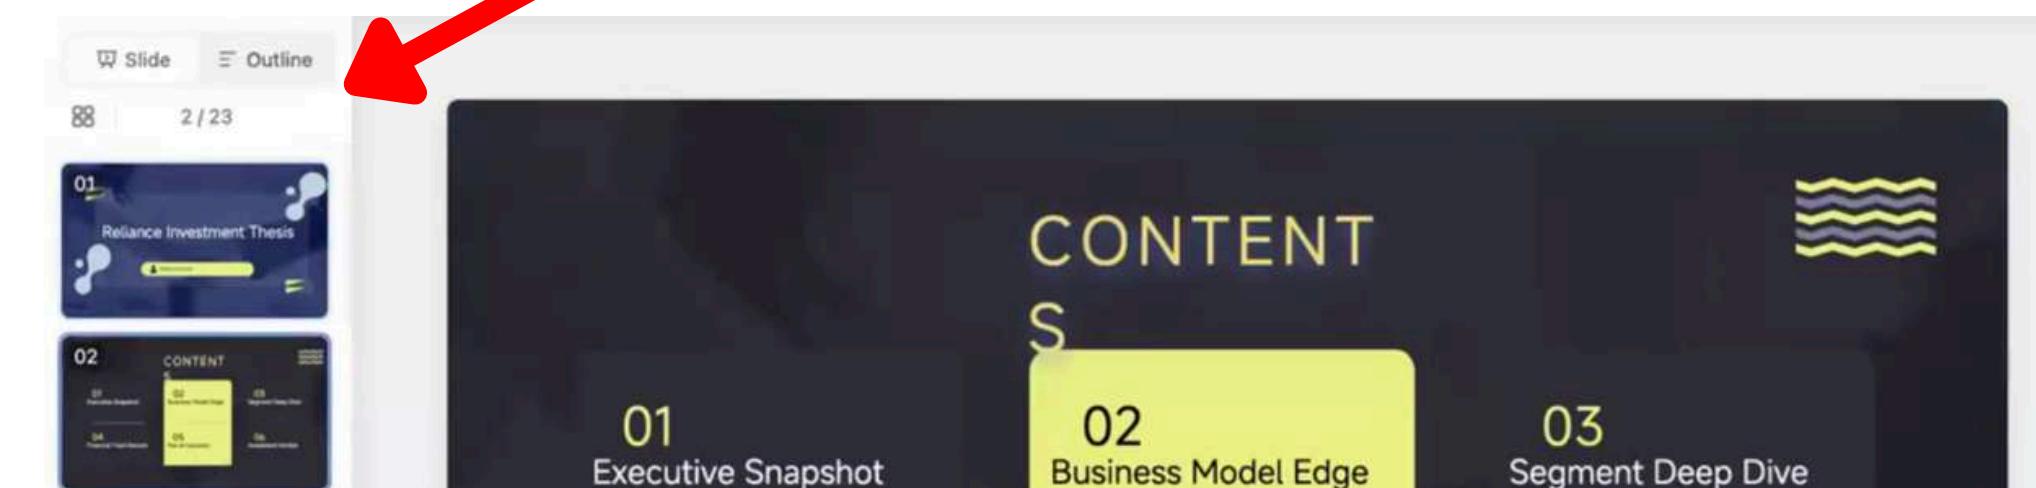

A screenshot of a generated quiz titled "Reliance Quiz" based on 35 sources. The first question asks: "What significant revenue milestone did Reliance Industries announce for the financial year ended March 31, 2025?". Option A is "Achieved an EBITDA of over \$125 billion", which is marked as "Not quite". Option B is "Recorded exports contributing to over 10% of India's total merchandise exports", which is marked as "Right answer". The correct answer is explained: "The company's exports were significant at ₹2,83,719 crores, but this contributed to 7.6% of India's total merchandise exports, not over 10%.". Option C is "Became India's first company to cross \$125 billion in annual revenues". The navigation bar at the top right shows "Reliance Quiz", "Based on 35 sources", and a refresh icon.

If you want to create a presentation, there is a bonus tool

Go to [kimi.com](https://kimi.com) and select the slide mode

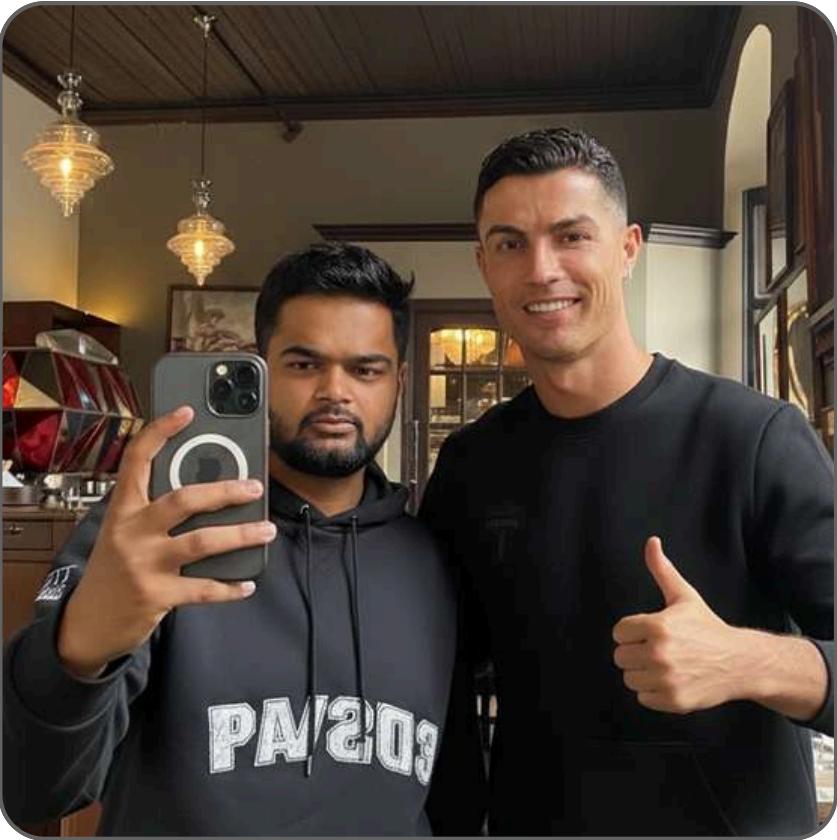

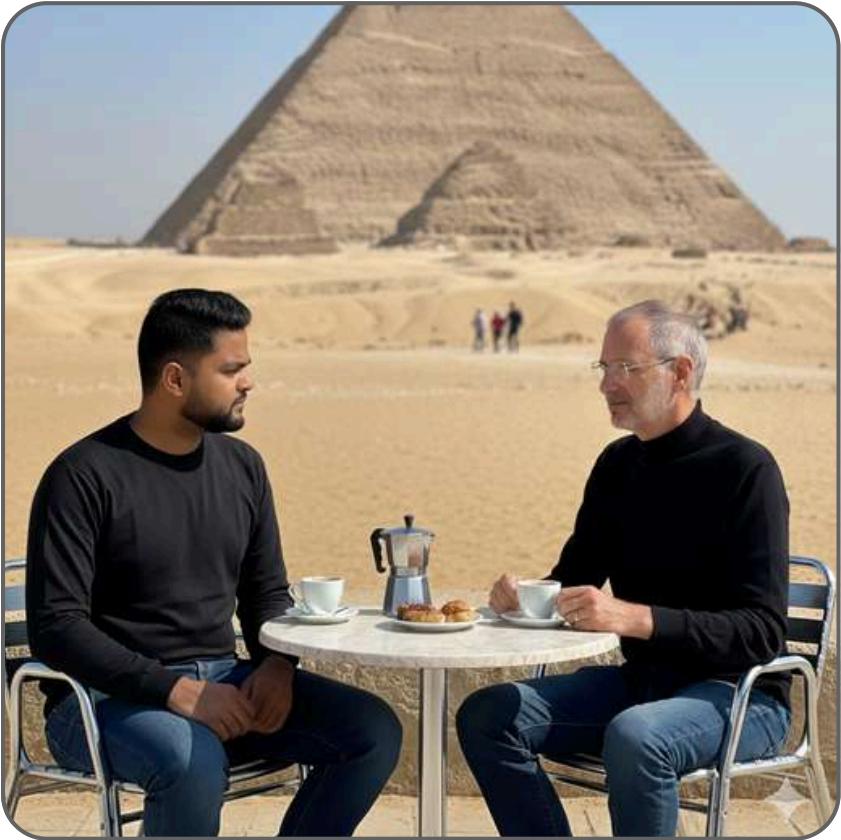

Give it a prompt based on your needs and start the chat. In just a few minutes, Kimi can generate an entire editable presentation.

# Gemini

## APPLICATION:

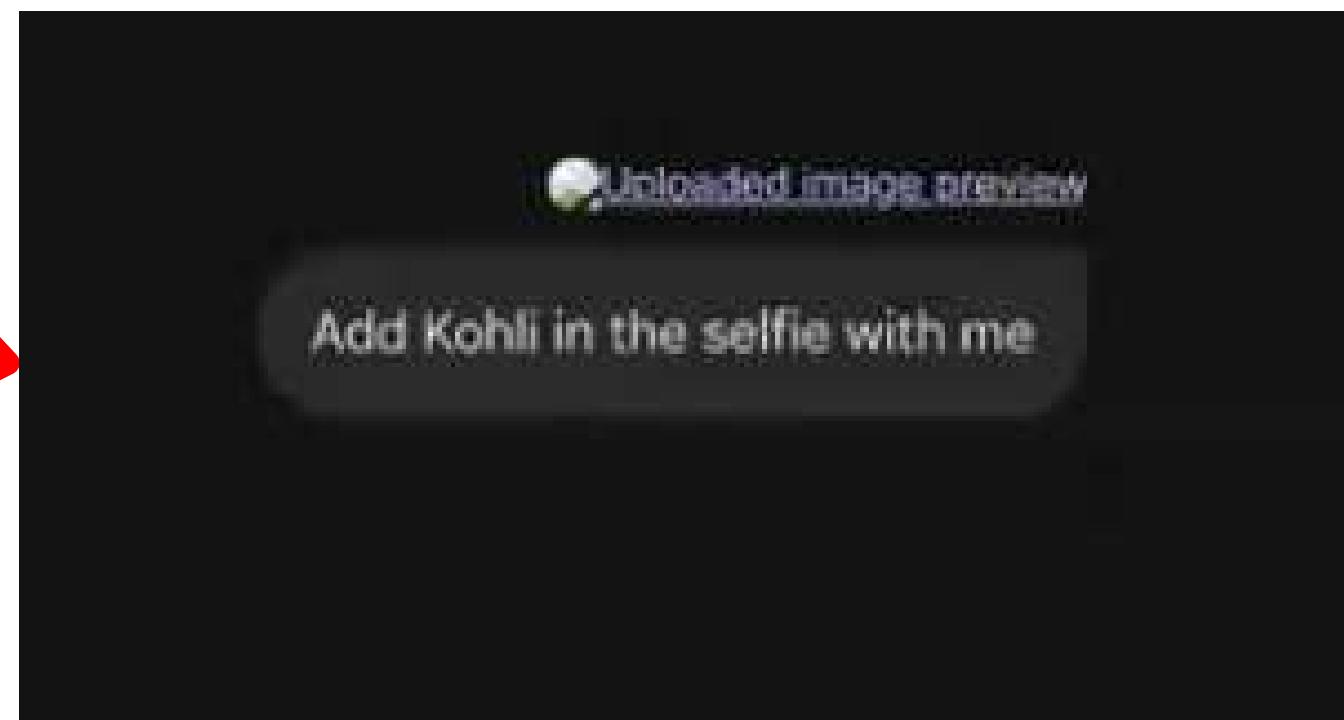

- Creating unique and engaging visuals for projects, social media content, and personal branding.

**Go to gemini.ai and select the file that you want to upload via upload file option.**

**Give it a prompt as per your need and start the chat.**

**Done your desired result will be ready in seconds.**

# Tool #4

Takes a lot of time to do web development?

Or you don't know how to do it?

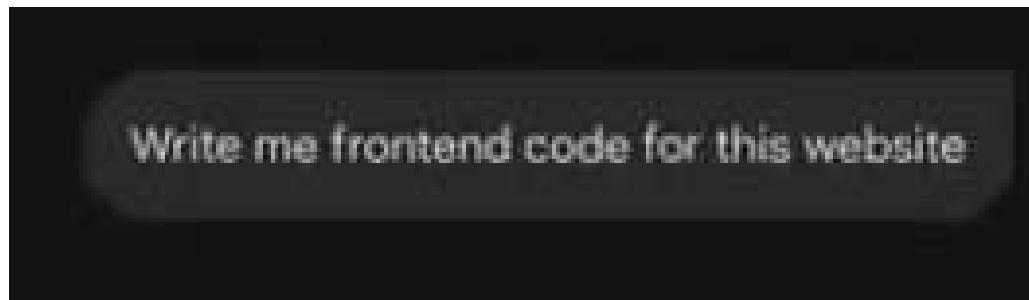

# Gemini

## APPLICATION:

- Can create UI for the website
- Can write code for the frontend
- Can write code for the backend

You can create a website from the image you provide.

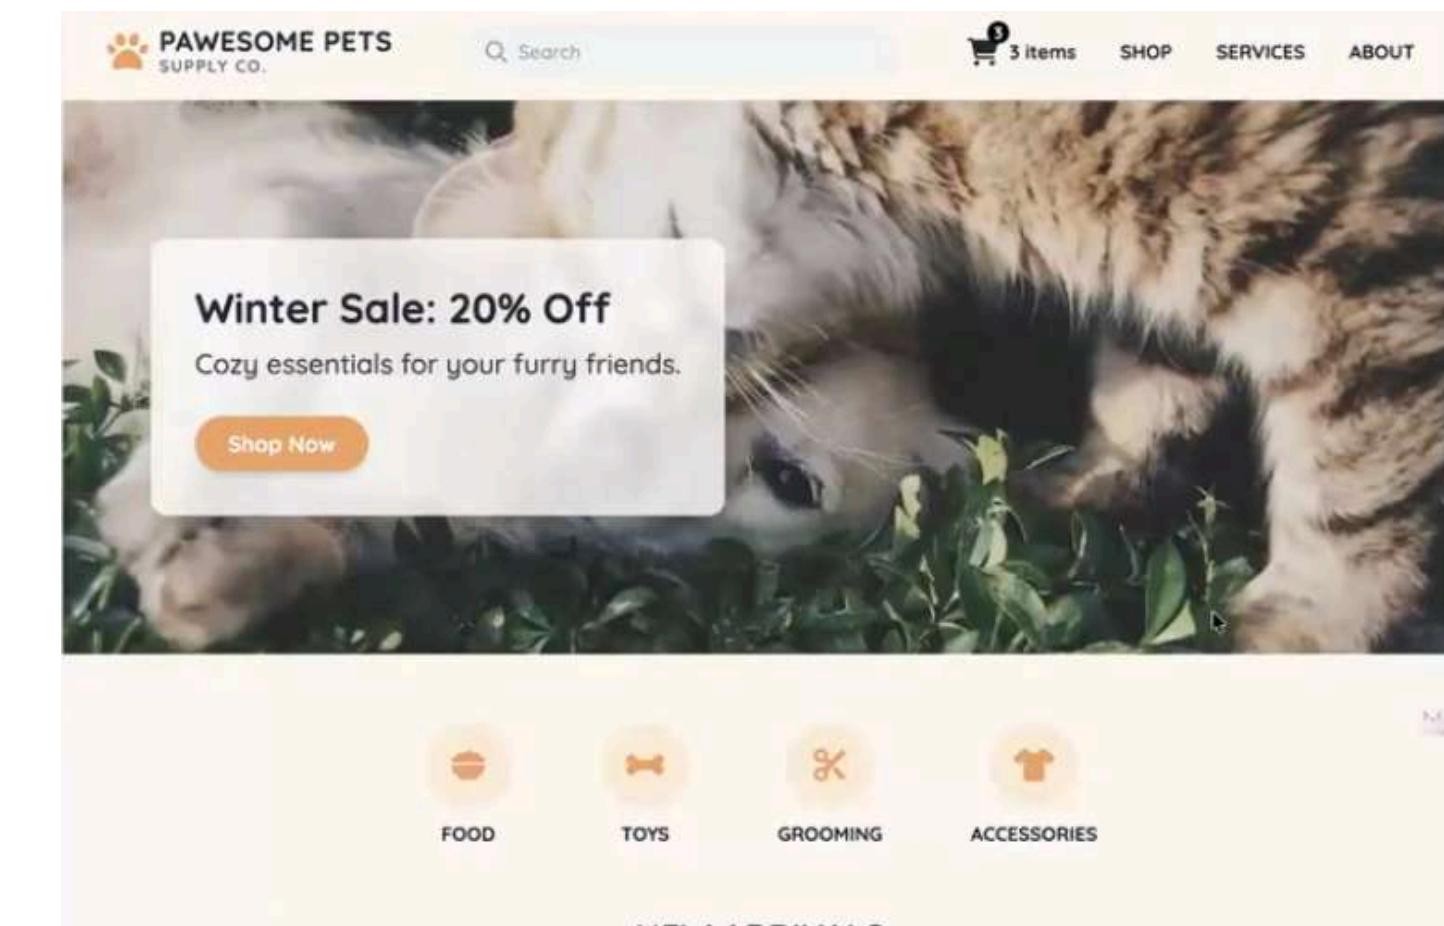

Give the prompt as well as the image as per your need and start the chat

Done your desired result will be ready in few minutes.

HTML

```
<div class="hidden md:flex items-center bg-gray-100 rounded-full px-4 py-2">
  <i class="fa-solid fa-search text-gray-400 mr-2"></i>
  <input type="text" placeholder="Search" class="bg-transparent outline-none" />
</div>

<div class="flex items-center space-x-8 font-bold text-sm">
  <div class="flex items-center space-x-2 cursor-pointer">
    <div class="relative">
      <i class="fa-solid fa-cart-shopping text-xl"></i>
      <span class="absolute -top-2 -right-2 bg-black text-white text-xs p-1">3 items</span>
    </div>
    <span>3 items</span>
  </div>
  <a href="#" class="hover:text-orange-500 transition">SHOP</a>
  <a href="#" class="hover:text-orange-500 transition">SERVICES</a>
  <a href="#" class="hover:text-orange-500 transition">ABOUT</a>
</div>
</nav>
```

# Tool #5

Want to build entire applications as well  
without coding knowledge?

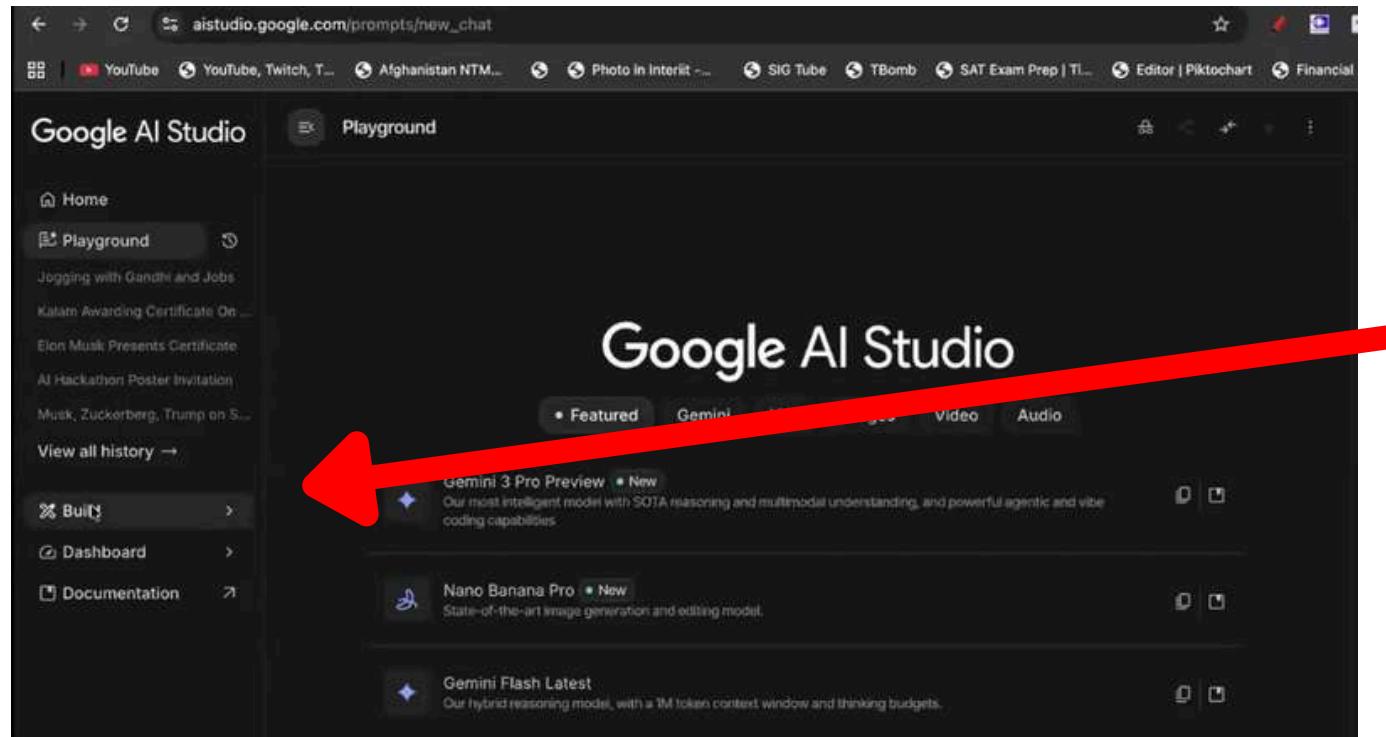

# Google AI Studio

## APPLICATION:

- Use latest models from google and create applications for free

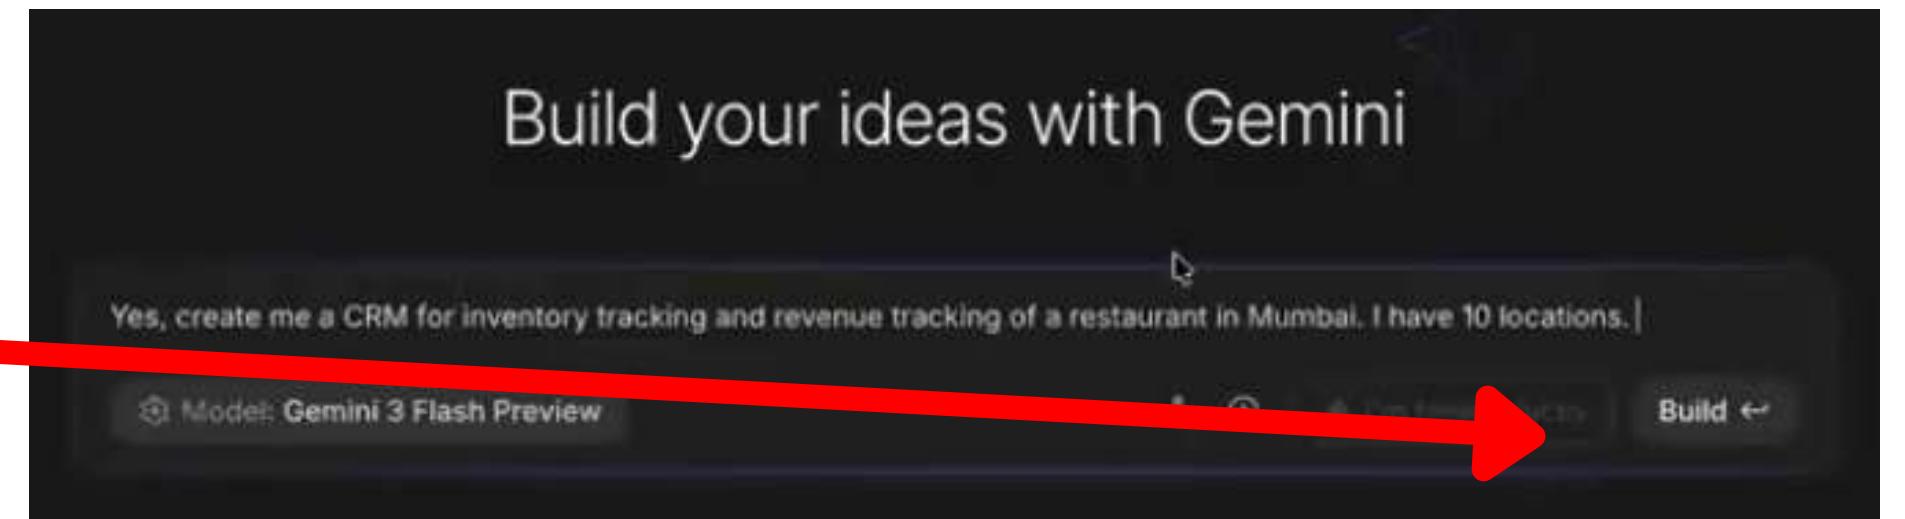

Google AI Studio

Go to [aistudio.google.com](https://aistudio.google.com) and click on build .

Give the prompt as per your need  
and start the chat

Done your desired result will be ready in seconds.

# Tool #6

Find it too time consuming to  
do Data Analysis and  
derive meaningful insights out of it?

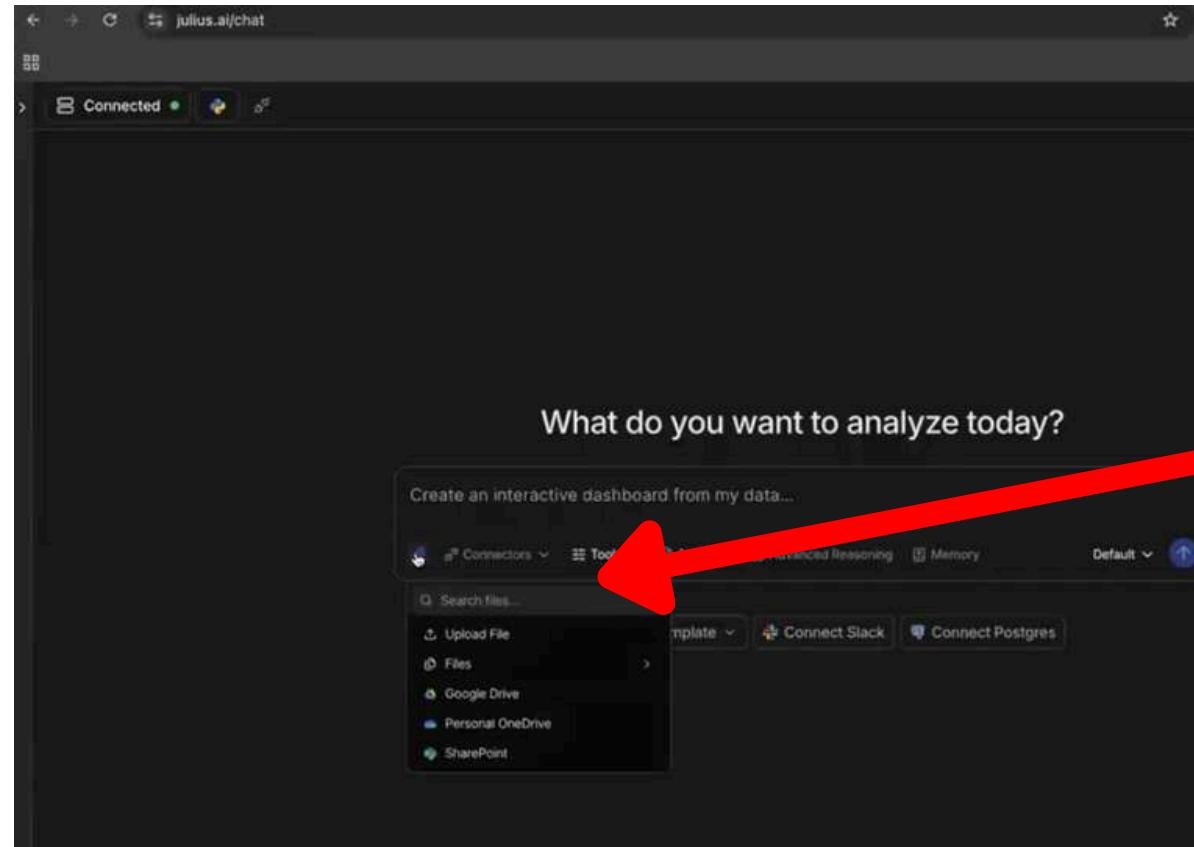

# Julius AI

## APPLICATION:

- Helps you analyse and visualise your data 10x better

Julius

Go to [julius.ai](https://julius.ai) and upload your dataset.

Give the prompt as per your need and start the chat

A screenshot of the julius.ai interface showing a dataset analysis. At the top, there are tabs for "Overview" and "Charts". Below that is a section titled "Quick Plot Suggestions" with four items. The main part shows a table of data with columns: S, Date, OPEN, HIGH, LOW, PREV CLOSE, BB65.00, C968.80, XWB9.73, \$3W1.60, \$2W1.75, VOLUME. Red arrows point from the text "Give the prompt as per your need and start the chat" up towards the "Overview" tab and from the "Analyse this dataset and give me key insights from it." input field down towards the table.

It provides useful insights along with different types of charts that are helpful for data analysis.

## 5. Practical interpretation

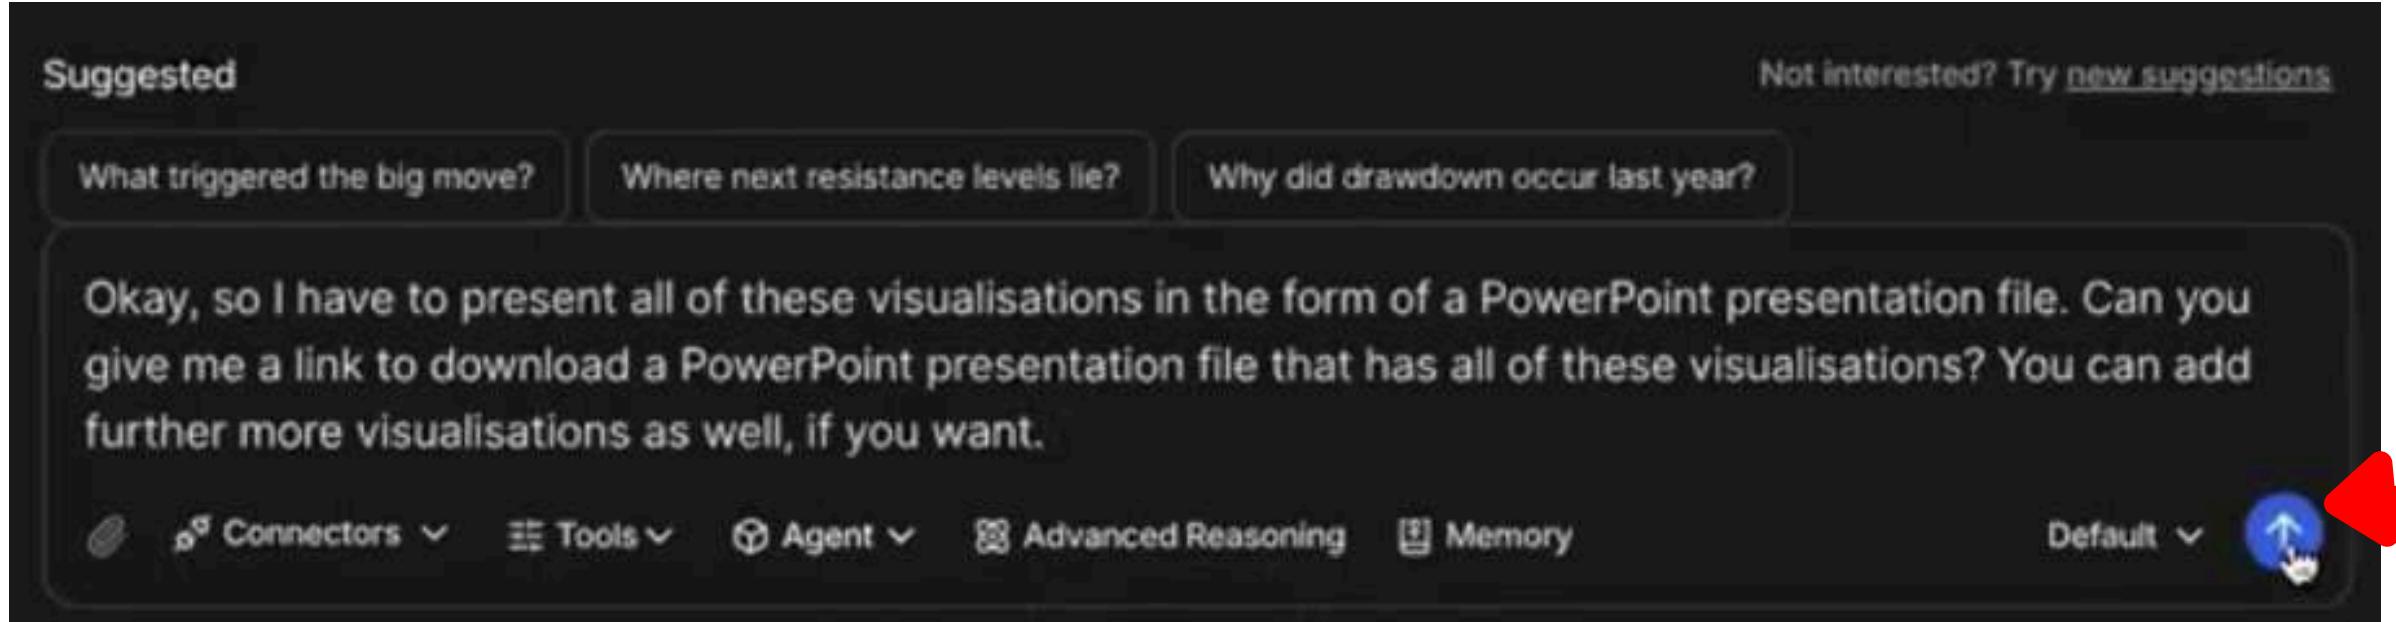

Putting it all together:

- **Trend:** No obvious long-term breakdown; price levels toward the latter part of the sample remain relatively strong versus the 52-week low.
- **Risk/vol:** Daily volatility is moderate; 20-day rolling vol fluctuates but does not show persistent extreme stress.
- **Liquidity:** Volume and trade counts indicate a consistently liquid stock with periodic high-activity sessions.

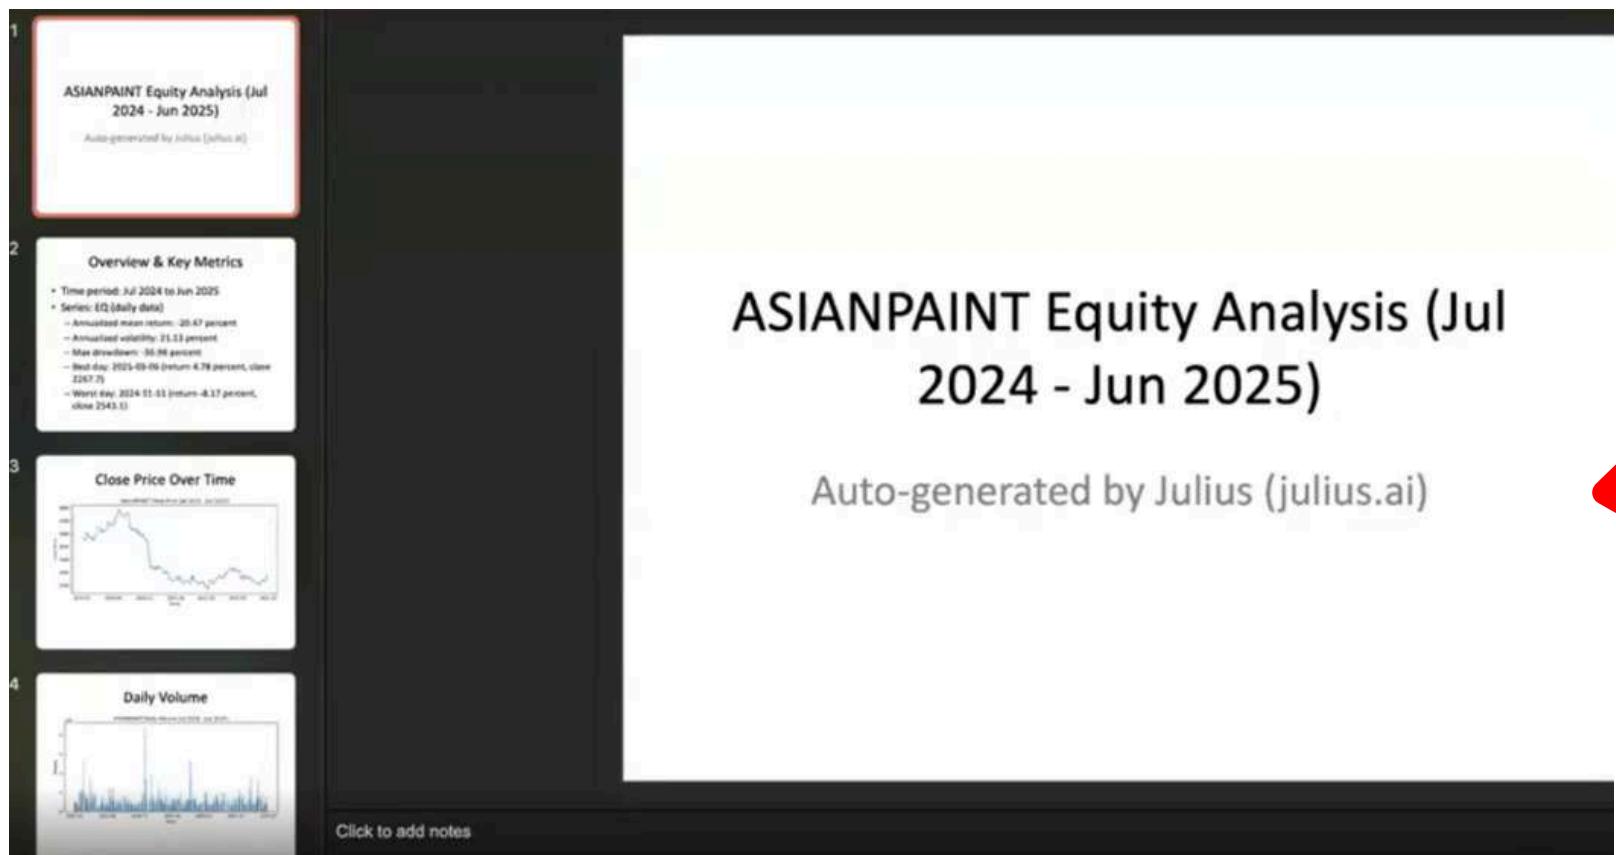

If you tell me what you care about (e.g., "I'm a swing trader", "I want to backtest a strategy", or "I'm a long-term investor"), I can:

- Build and interpret moving averages / RSI / MACD.
- Run a **backtest** for simple strategies on this exact dataset.
- Compute max drawdown, Sharpe-like metrics, or identify best/worst days.

# You can also create a PPT containing all the useful insights.

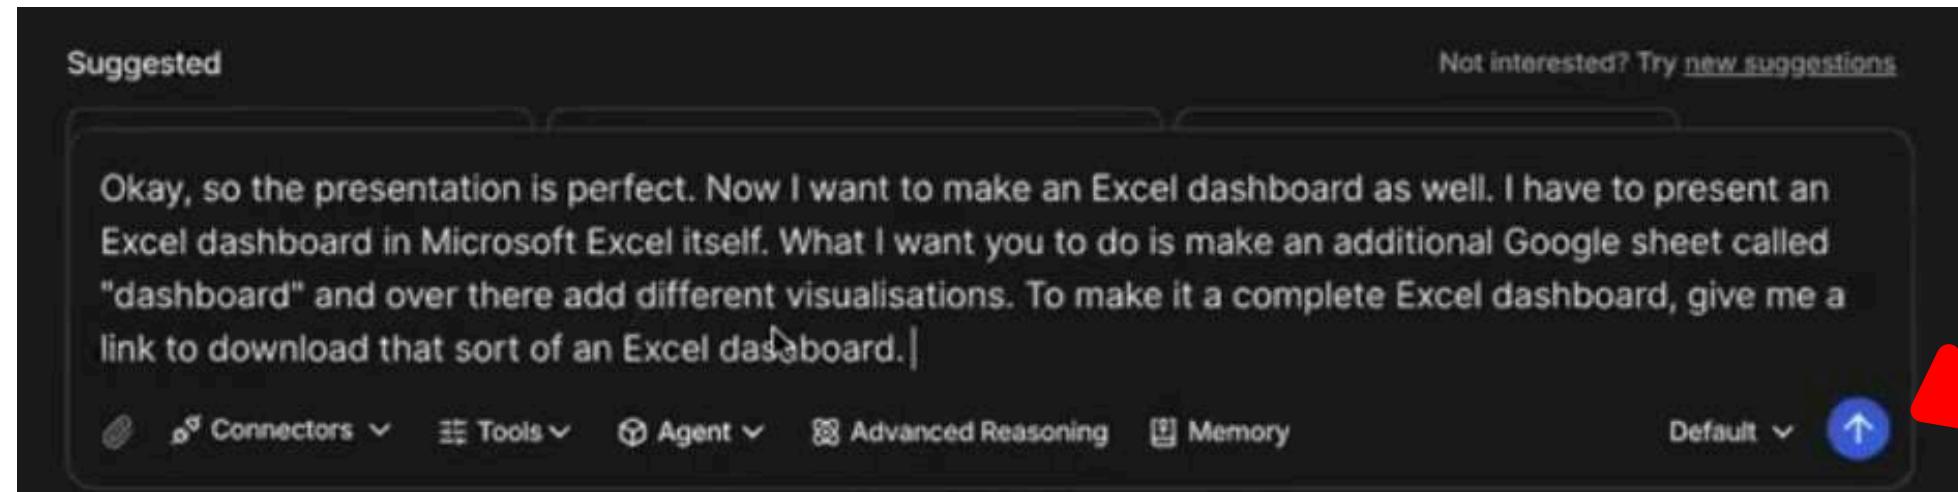

**Give the prompt and start the chat**

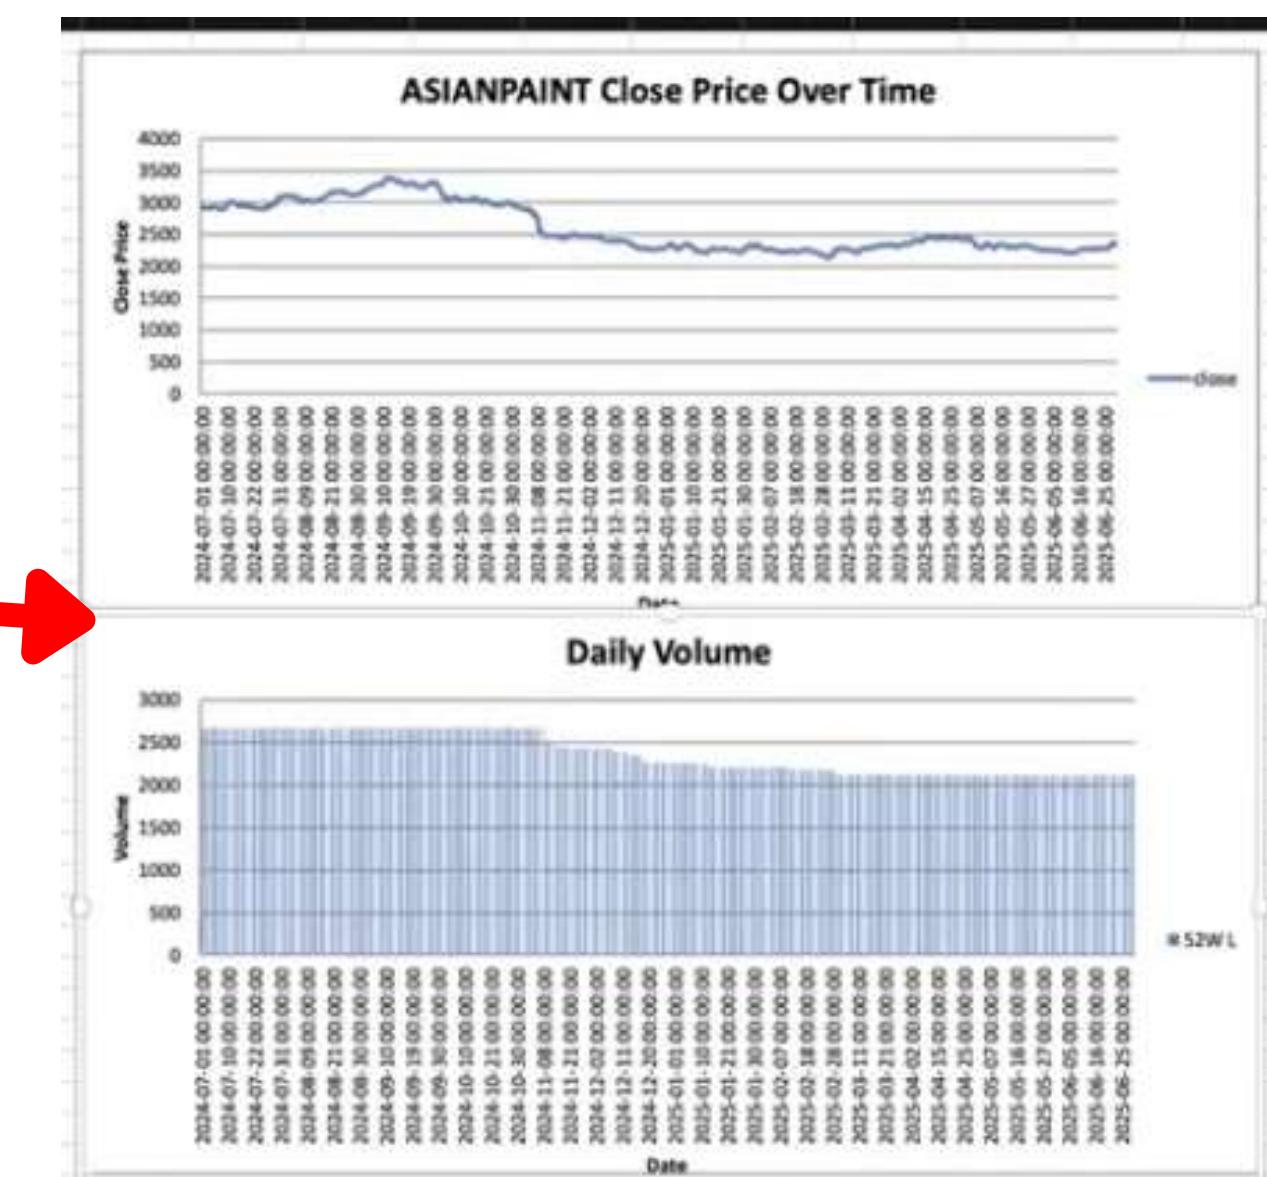

**Done your desired result will be ready in seconds.**

# You can also create an Excel dashboard for the given dataset.

Done your desired result will  
be ready in seconds.

Provide a prompt tailored to  
your needs and start the chat

## Tool #7

Not getting enough interview calls for  
the jobs you're applying for?

# 10X Resume Hack

**Step 3: After pasting your resume start the chat.**

#### About the job

Job Title: Gen AI Prompt Engineer

Full-time

Hybrid role (Vishakhapatnam/Hyderabad)

#### Role Summary

We are seeking a Gen AI Prompt Engineer to design, develop, and optimize prompts for Large Language Models (LLMs). The role focuses on improving AI responses, automating workflows, and enabling consistent and accurate outputs for business use cases. The ideal candidate combines strong communication skills, structured thinking, and a deep understanding of AI behavior.

#### Key Responsibilities

- Create, refine, and test prompts to improve LLM performance across various use cases.
- Convert business requirements into structured prompt flows, templates, and reusable prompt libraries.
- Perform A/B testing of prompts and evaluate output accuracy, tone, and consistency.
- Analyze AI-generated results, identify gaps or hallucinations, and fine-tune prompts accordingly.

After that it will ask you the required job description.

**Step 4: Copy the job description and again paste it in the tool.**

After that it will provide you the updates it need, your old and new ATS score.

Update your resume after this.

Category	Match
Mathematics domain knowledge	✗ Not mentioned explicitly
AI/ML experience	✓ Strong match
Writing/communication skills	✓ Mentioned briefly

## Tool #8

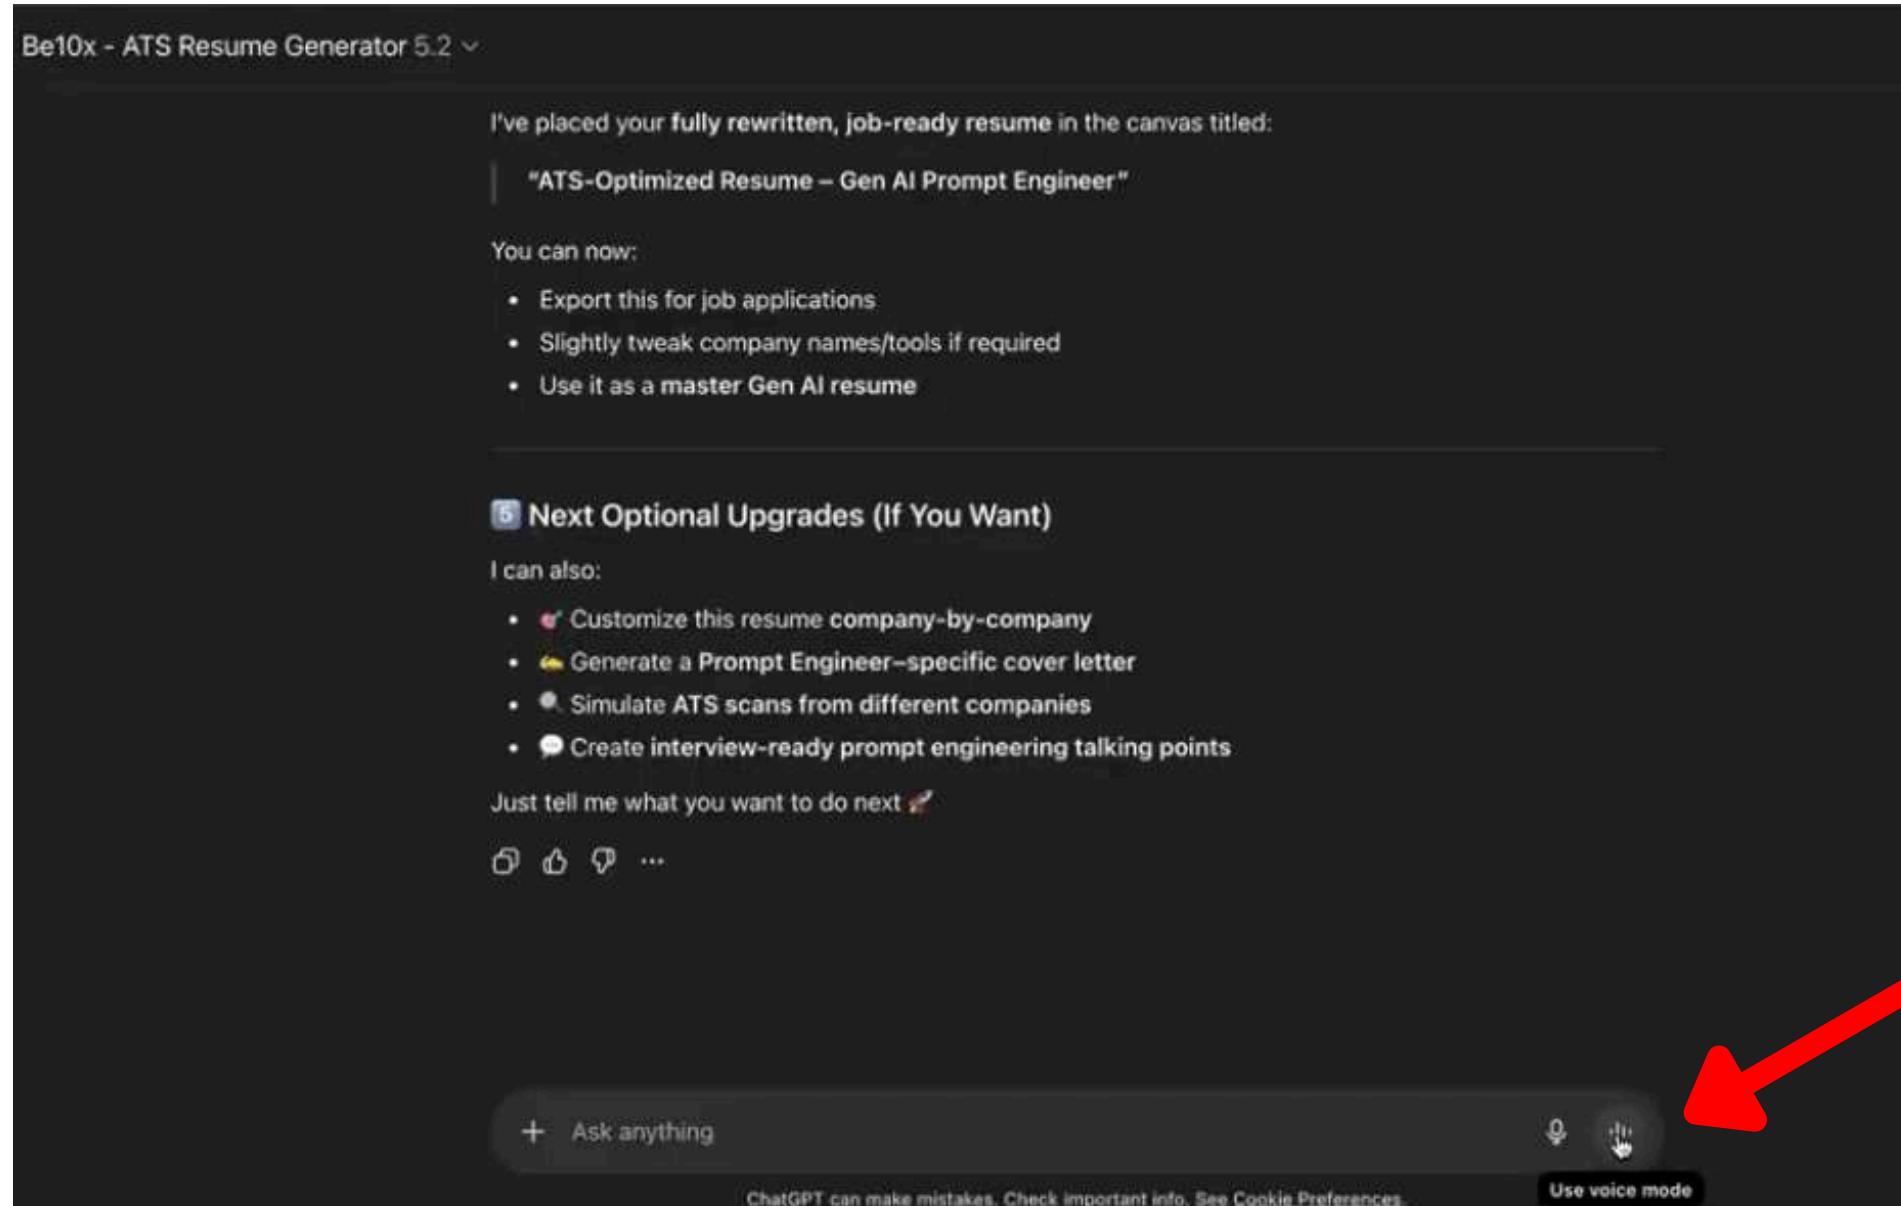

Finally resume got shortlisted but  
don't have enough confidence to crack  
such job interviews?

# ChatGPT

## APPLICATION:

Use ChatGPT's Voice Feature to practice real-time mock interviews and boost your confidence!

**Use the ChatGPT Voice feature to have ChatGPT act as your interviewer, ask challenging questions related to the job role, and help you prepare for your interview**

# Tool #9

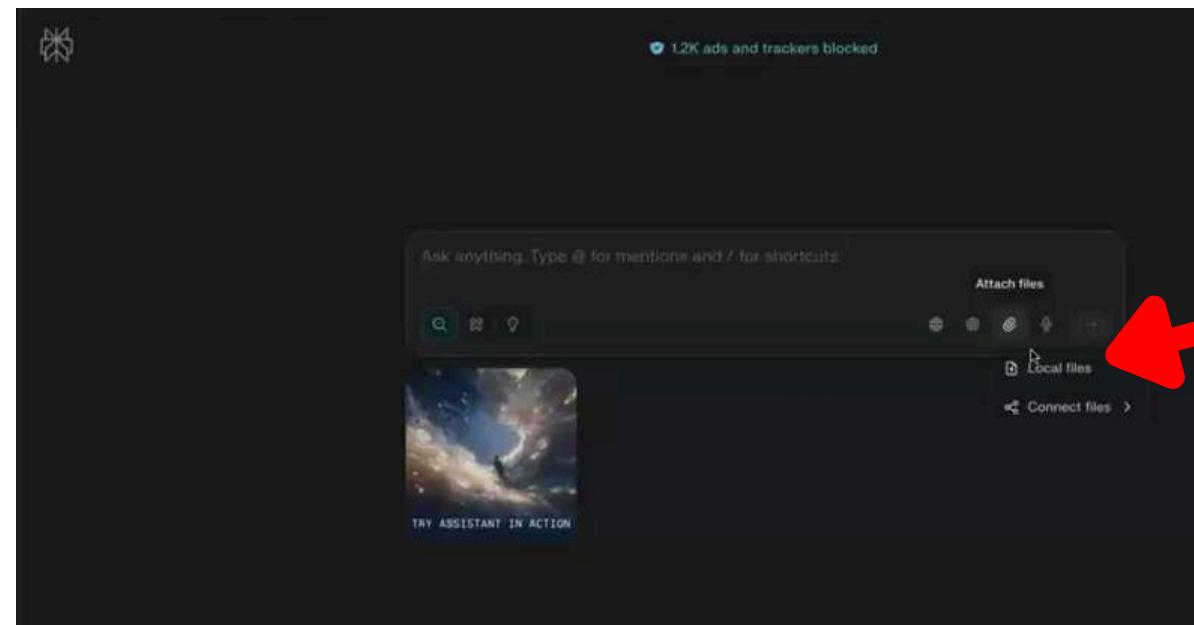

Difficult to find high paying jobs where  
you can apply?

# Comet

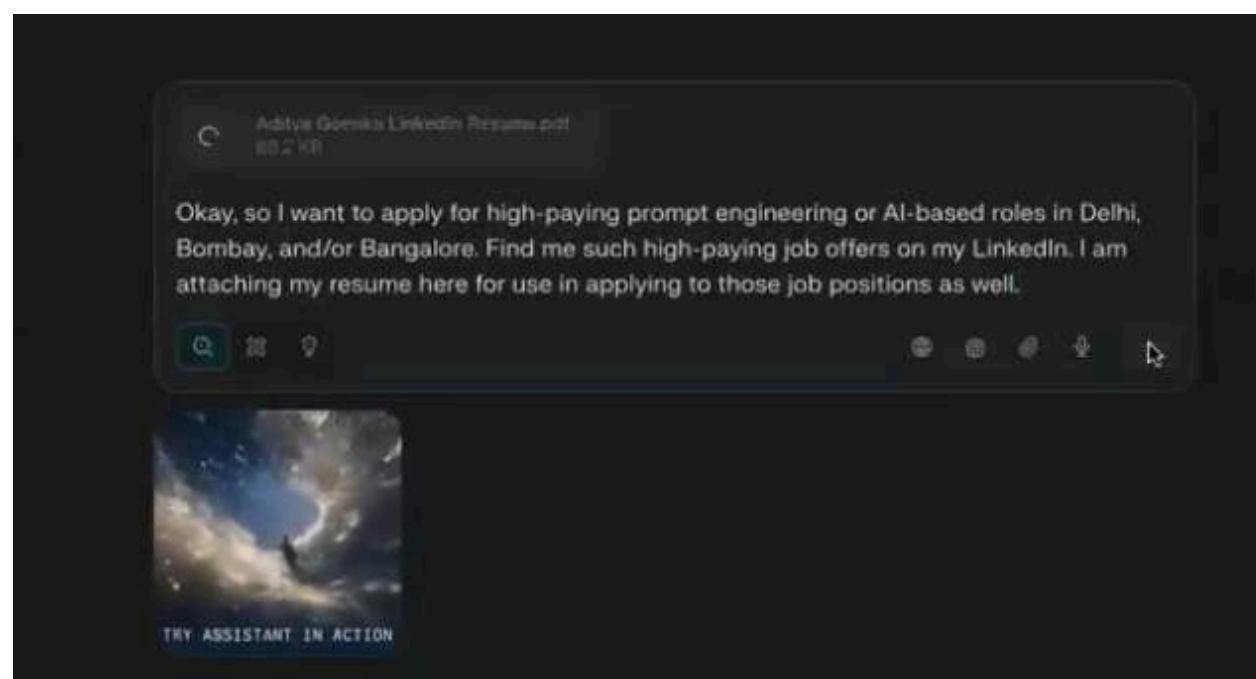

## APPLICATION:

- Use Comet to find and apply for high-paying, AI-matched job opportunities tailored to your profile and goals.

**Step 1: Download the Comet browser and attach your resume.**

**Step 2: Give the prompt as per your need and start the chat.**

**It will go to your LinkedIn and search for jobs based on the prompt you enter.**

The image shows a screenshot of the LinkedIn mobile app interface. On the left, there's a sidebar titled "In my network" with a dropdown for "Greater Bengaluru Area". It lists four job posts:

- Prompt Engineer** at Skit.ai (Bengaluru East, Karnataka, India, On-site) posted 2 months ago.
- Generative AI Engineer - Immediate Joiners** at LTIMindtree (Bangalore Urban, Karnataka, India, Hybrid) posted 3 weeks ago. It includes a note: "Actively reviewing applicants".
- AI Product Engineer** at upliance.ai (Bengaluru, Karnataka, India, On-site) posted 3 days ago.
- Member of Technical Staff - AI/ML [ Natural Language Processing, Transformers, Gen AI, LLM, Neural Networks]** at (redacted) posted recently.

The main content area shows a job listing for a **Prompt Engineer** at Skit.ai. The listing includes the job title, location (Bengaluru East, Karnataka, India), posting date (2 months ago), and a note: "Over 100 people clicked apply". It also shows filter options "On-site" and "Full-time", and buttons for "Apply" and "Save". Below the listing, a message says "Job match is low, review match details" with a note: "Your profile is missing qualifications, add your experience or try exploring other jobs". Buttons for "Show match details" and "Help me update my profile" are present.

To the right of the LinkedIn interface is a vertical notes sidebar:

- Perfect! I'm now on the Jobs page. I can see some suggested jobs, but I need to search specifically for prompt engineering or AI-based roles. Let me click on the search box and search for these roles.
  - Clicking
  - Typing: prompt engineering
- Good! I can see the search box has "prompt engineering" typed in it. Now I need to press Enter to search for these jobs.
  - Pressing key: Return

# Tool #10

Want to see how my  
Personal Assistant (an agentic AI  
employee) works 24\*7 for me?

# n8n

## APPLICATION:

- Automate workflows, integrate apps, and streamline tasks with no-code automation to improve productivity and business efficiency.

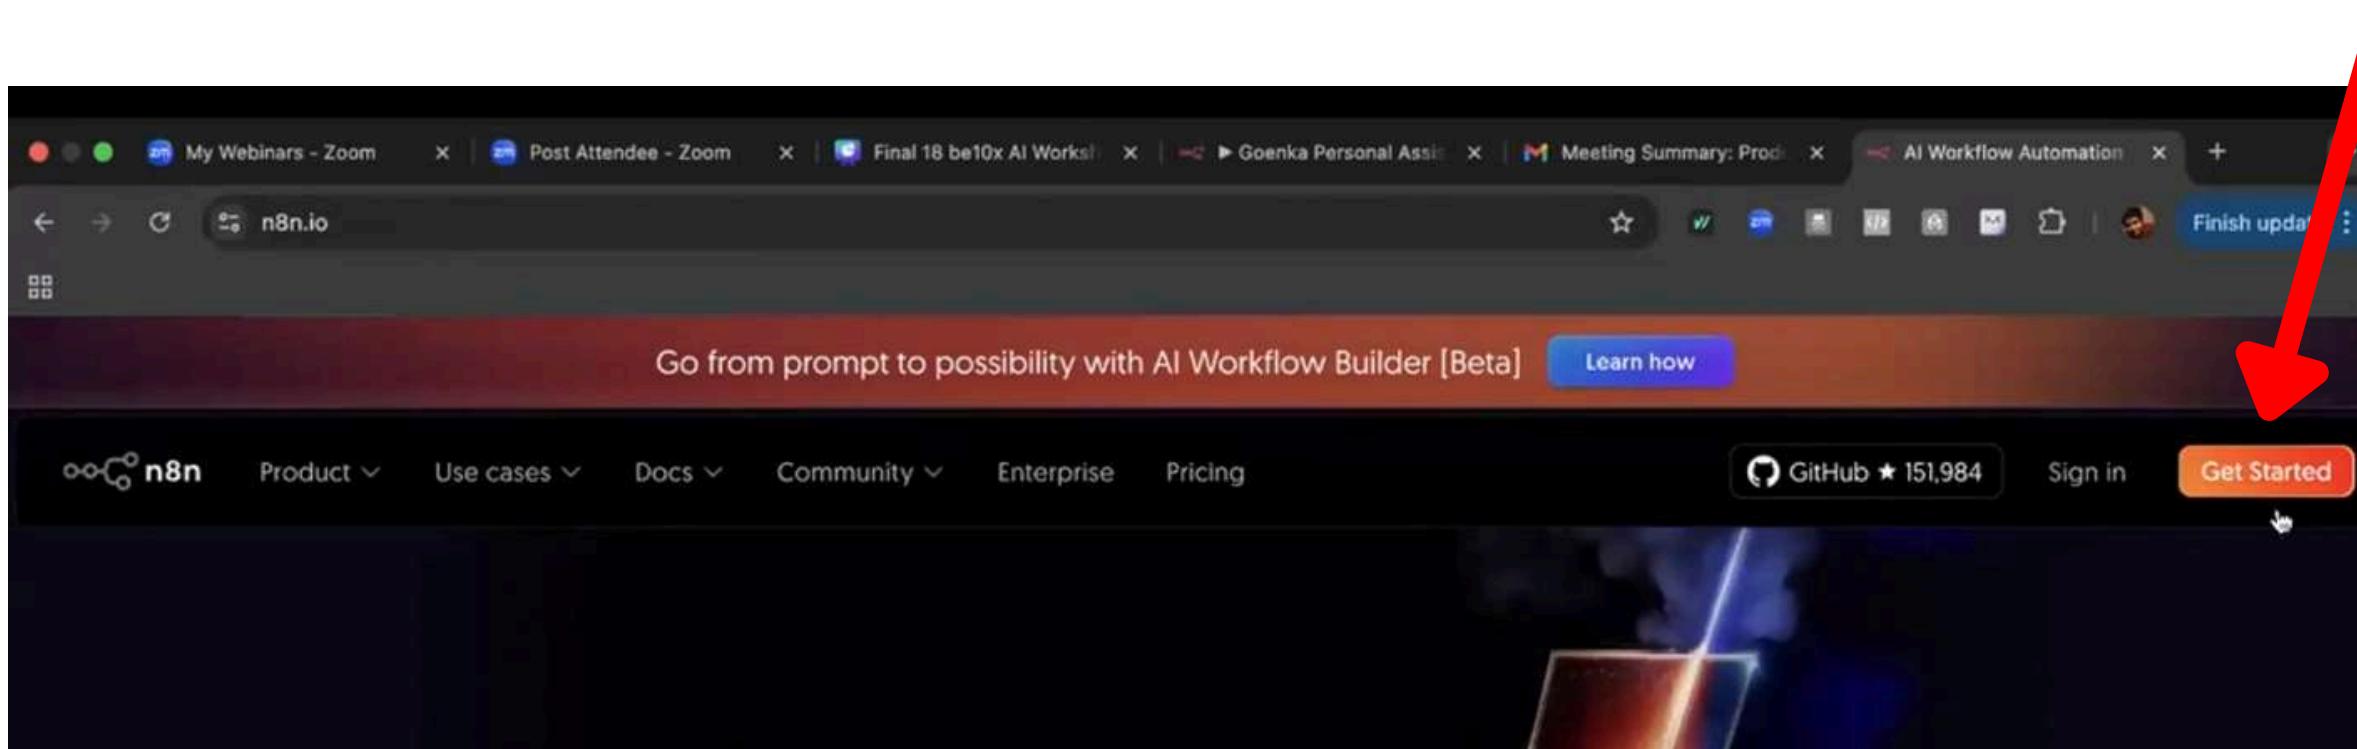

## Introduction to n8n

**Functionality:** n8n is a tool used to automate workflows, integrate applications, and streamline tasks with no-code automations.

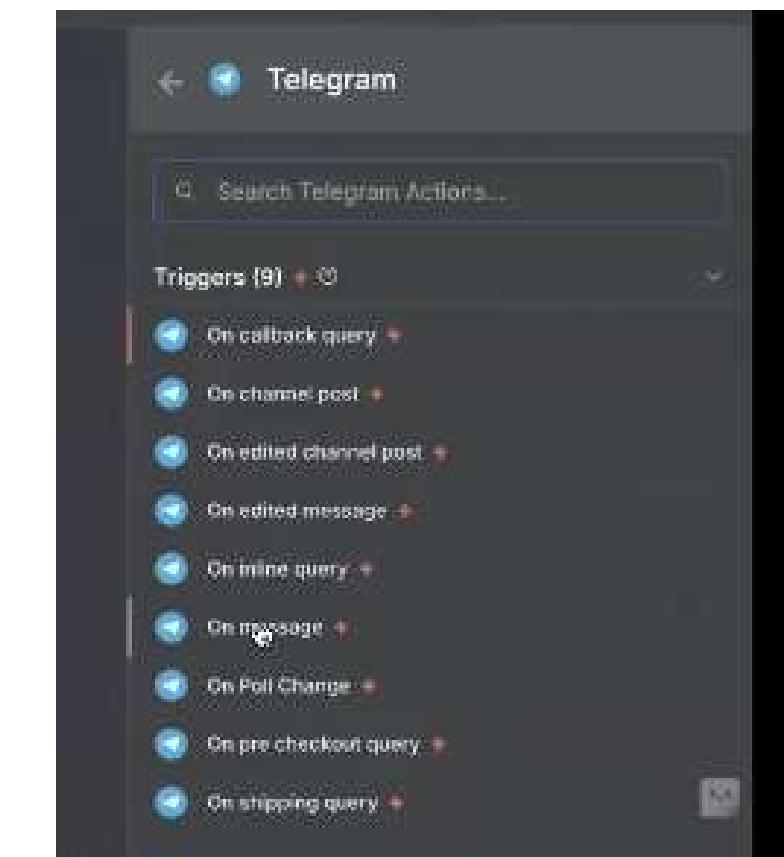

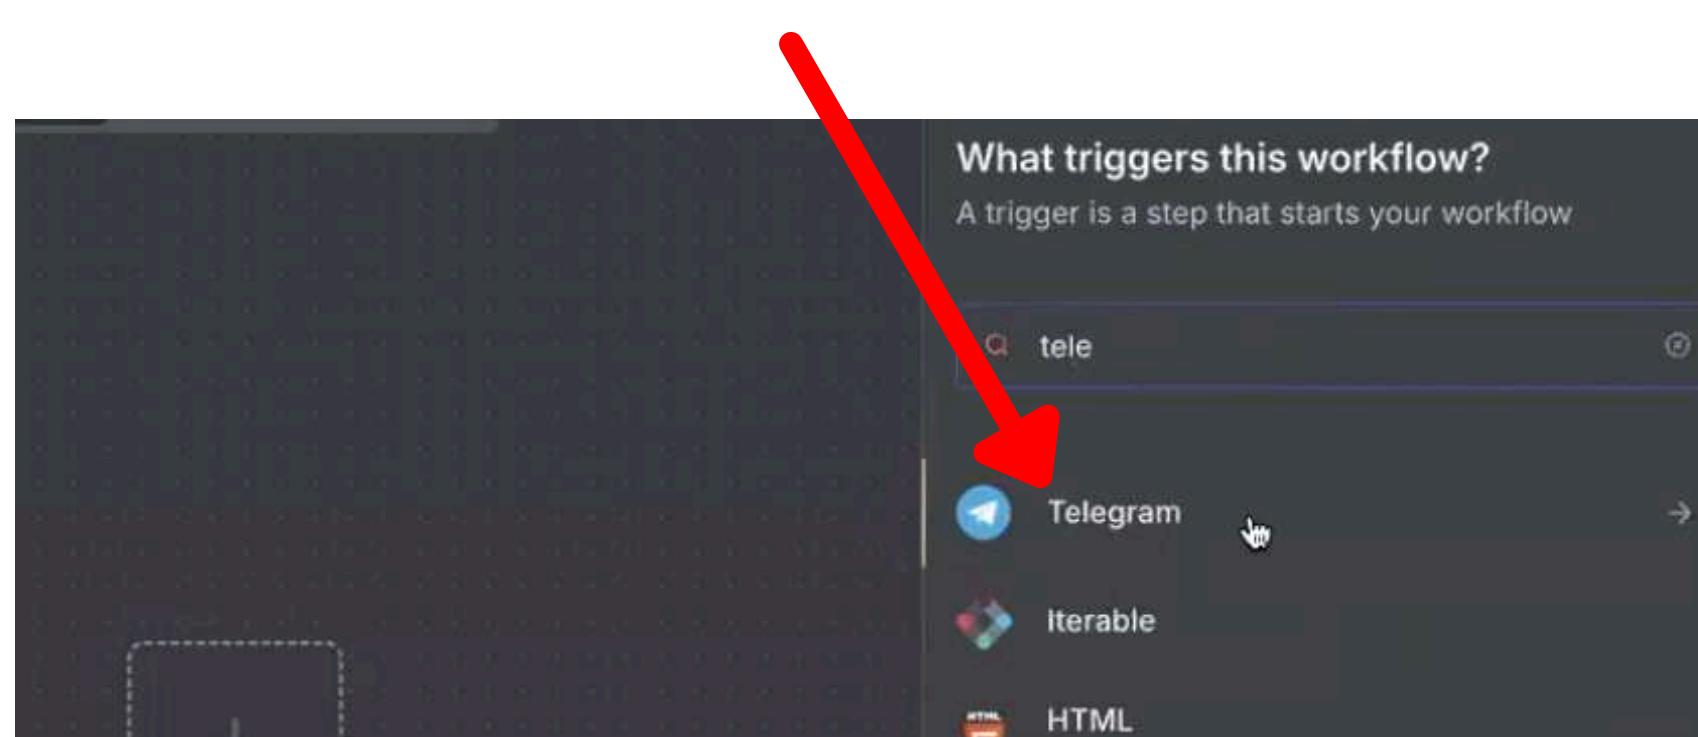

## Setup: Accessing the n8n Workflow Canvas

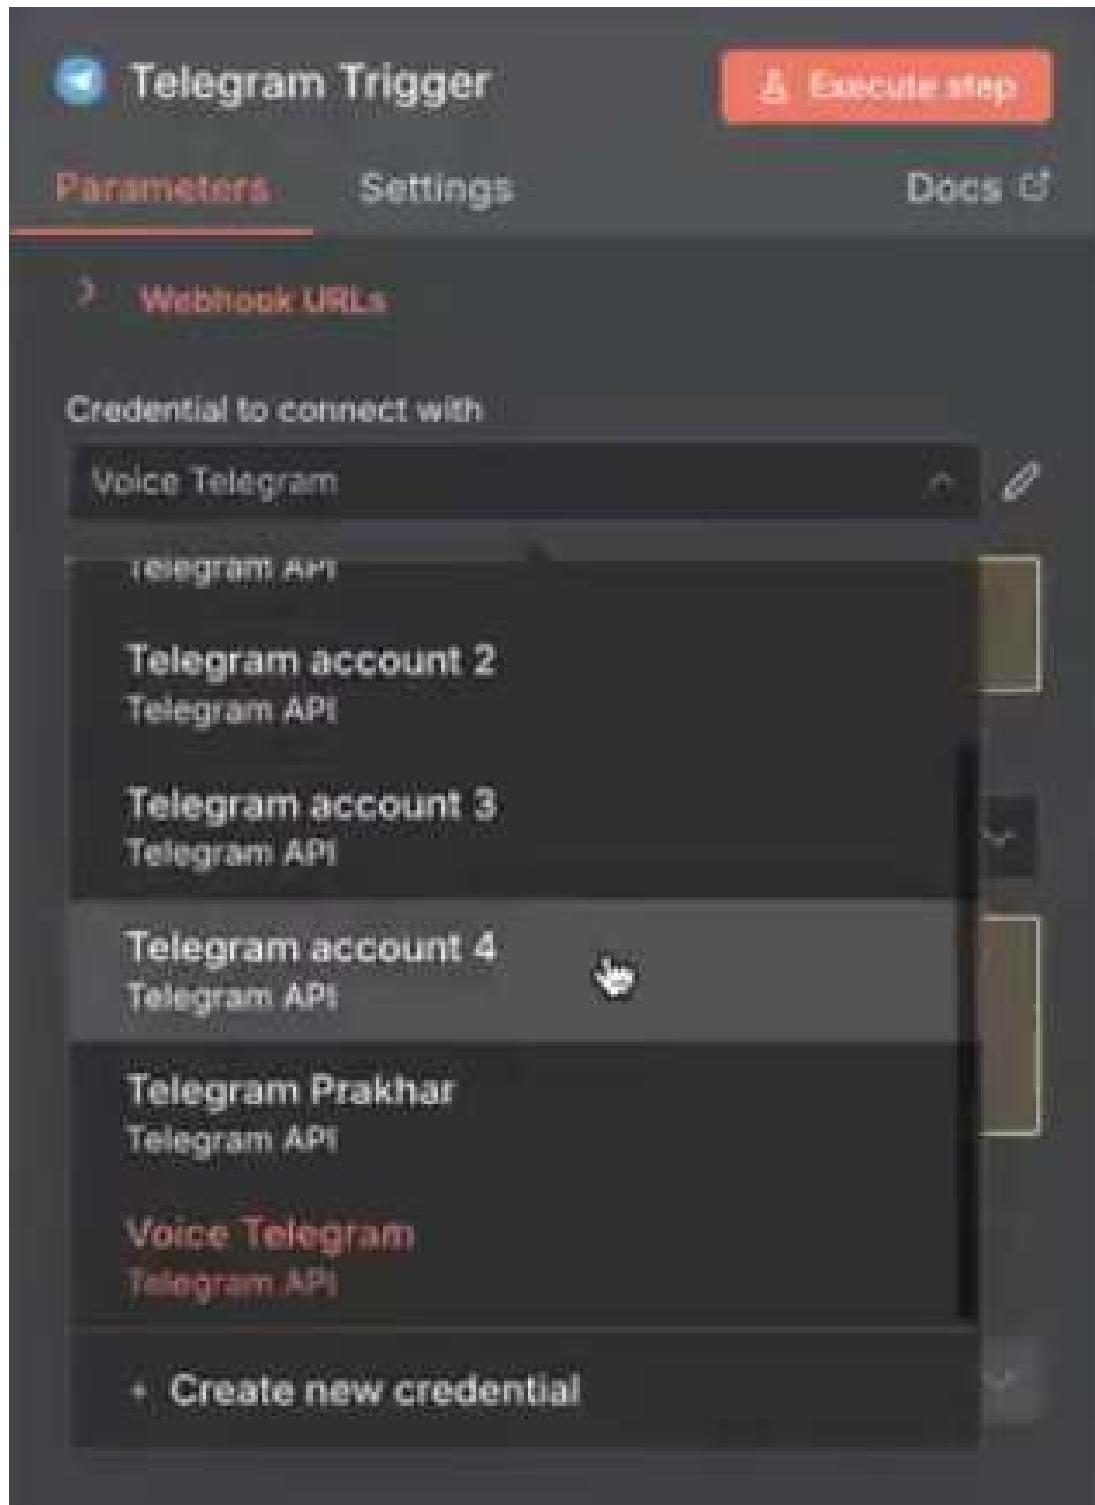

1. Navigate to the n8n website ([n8n.io](https://n8n.io)).
2. Click on "Get Started" and create a free account.
3. Once logged in, navigate to the Workflows section.
4. Click on "Create workflow" to access a blank canvas where automation building begins

# Step 1: Define the Input (Trigger Node)

- Click on the "Add first step" button.
- The first step defines how you will provide input (the prompt) to the personal assistant.
- Search for your desired input platform (e.g., Telegram, Slack, Microsoft Teams, Google Chat, Zendesk).

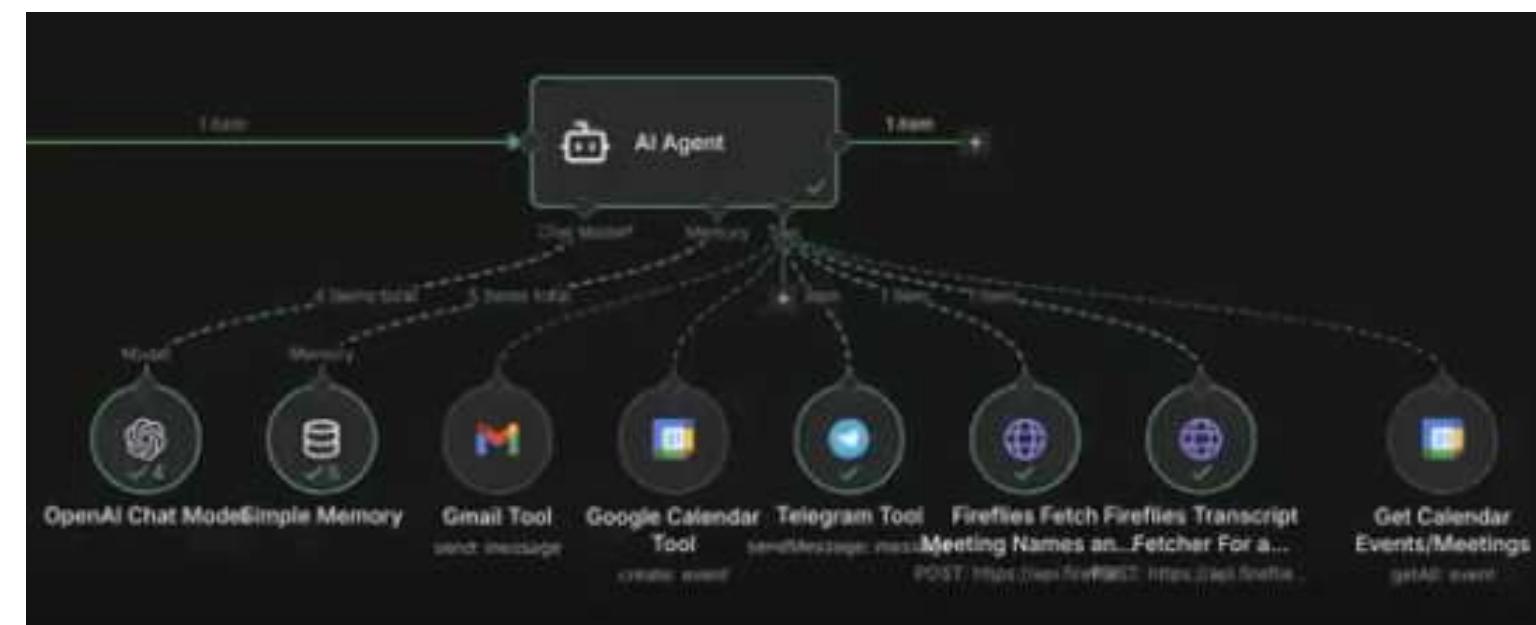

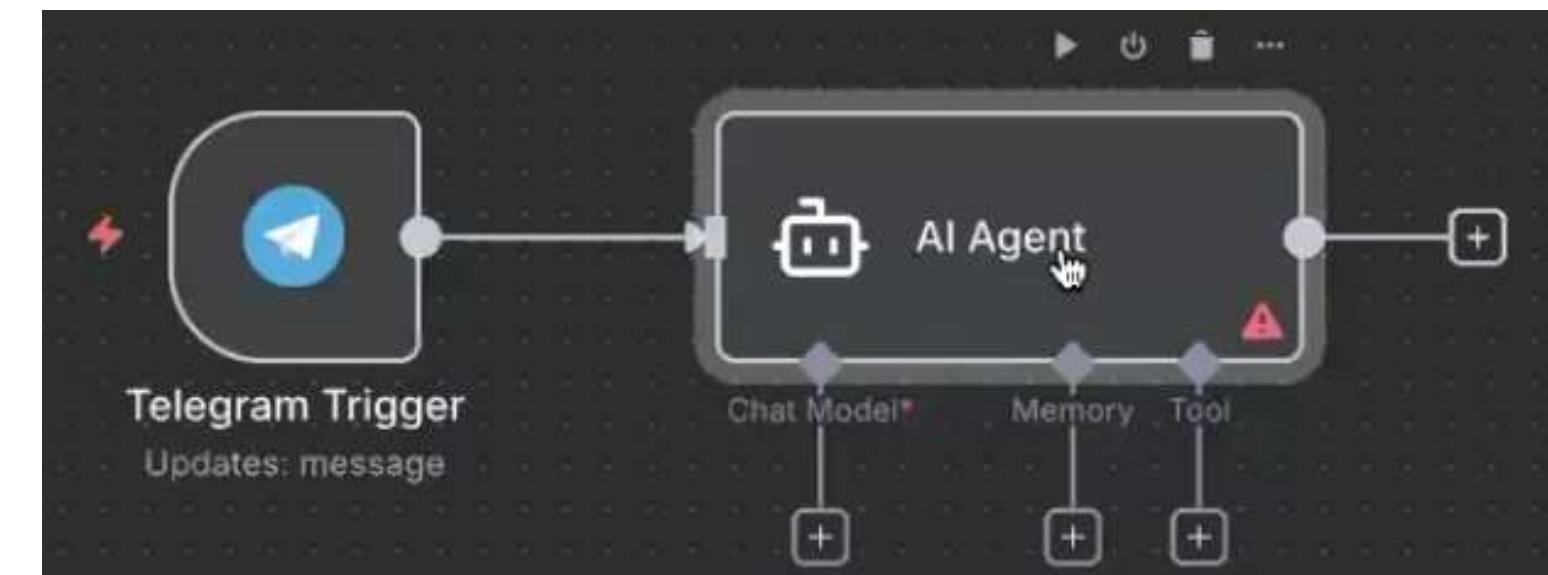

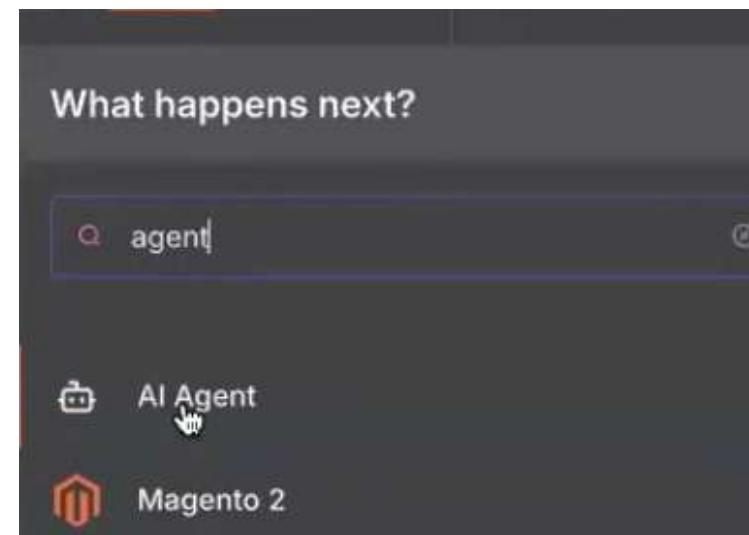

4. For this demonstration, search for and select Telegram.
5. Set the trigger action to respond "on receiving any such message from Telegram".
6. Connect your Telegram account via "Create New Credential".

## Step 2: Integrating the Core AI Agent

1. Click the Plus (+) button next to the Telegram node to add the next step.
2. Search for and select the "agent" node. This node represents the central processing unit or the core AI Personal Assistant that interprets and executes tasks.

## **Step 3: Connecting Necessary Tools (APIs)**

1. Use the Plus (+) button to connect various tools (APIs/integrations) that the AI agent needs to perform complex actions.
2. Key Insight: The AI agent is designed to be smart enough to understand the user's command (input in Telegram) and automatically call the necessary tools without the user defining a sequential workflow (e.g., "first go to Gmail, then go into GPT").
3. To connect tools: Select the tool (e.g., "Open AI Chat Model") and input necessary credentials (e.g., API key).

## Example Tools Connected to the Agent

The demonstration agent was pre-built with the following tools to support diverse PA functions:

- **Open AI Chat Model (GPT-5):** Used for general queries, understanding messages, and complex summarization tasks.
- **(Read):** To read and process email information.
- **Gmail (Send/Draft):** To send messages or draft mails based on instructions given via the Telegram bot.

## Example Tools Connected to the Agent

- **Google Calendar:** To retrieve calendar events or create new appointments.
- **Fireflies:** To fetch transcripts or details about meetings.
- **Google Search:** To conduct web searches for information (e.g., finding local coffee places).
- **Output Node:** To send the final response back to the user (e.g., into the Telegram chat).

## Execution Demo 1: Fetching Information

**Objective:** Get a list of meetings.

**Action:** In the linked Telegram bot, enter the prompt: "hey I was not able to attend any of the standups or meetings day before yesterday. So can you give me a list of all the meetings which happened day before yesterday?".

**Process:** The agent reads the Telegram message, interacts with the GPT model to understand the need, and automatically accesses Google Calendar to pull the data.

**Result:** The agent returns a list of all the meetings conducted that day directly in the Telegram chat.

## **Execution Demo 2: Complex Action (Summarization)**

**Objective:** Summarize a specific meeting.

**Action:** In the Telegram bot, enter the follow-up prompt: "tell me a detailed summary of the whatever happened in the product ops support tech standup. So give me all of the points in a detailed bullet format".

**Process:** The agent interacts with multiple tools (Fireflies to get the transcript; GPT-5/Open AI model for summarization).

**Result:** A detailed summary of the meeting is provided in the Telegram chat.

# SO FAR, WE HAVE GONE FROM ZERO KNOWLEDGE IN AI TO...

The screenshot shows the Grok AI interface. At the top, there's a text input field containing the query: "act as a senior level consultant. make me a detailed research report on future of jobs because of this AI revolution". Below this, the interface displays a "DeepSearch" card with the following details:

- 17s
- Thinking
- Breaking down topic

A main panel on the right shows the results of the search:

- The request is for a detailed research report on the future of jobs due to the AI revolution. It's a broad topic, so let's break it down into key areas

# SO FAR, WE HAVE GONE FROM ZERO KNOWLEDGE IN AI TO...

The screenshot shows the Gemini interface. On the left, there's a sidebar with a "Gemini" logo and a "2.5 Pro (preview)" dropdown. Below it are sections for "Include error handling.", "Ensure the API key is handled correctly (empty string, as per instructions).", and "Add styling for the new buttons and the output areas.". A main content area contains text about enhancing a "Reel Ireland" website with AI-generated content. It lists two features: "Suggest a Trip Plan" and "Fishing Story Idea". Below this, there's a summary of changes and a note about adding necessary HTML elements and JavaScript functions. At the bottom, there's an "Ask Gemini" input field with options for "Video", "Deep Research", and "Canvas". A small note at the bottom says "Gemini can make mistakes, including about people, so double-check it. Your privacy and Gemini".

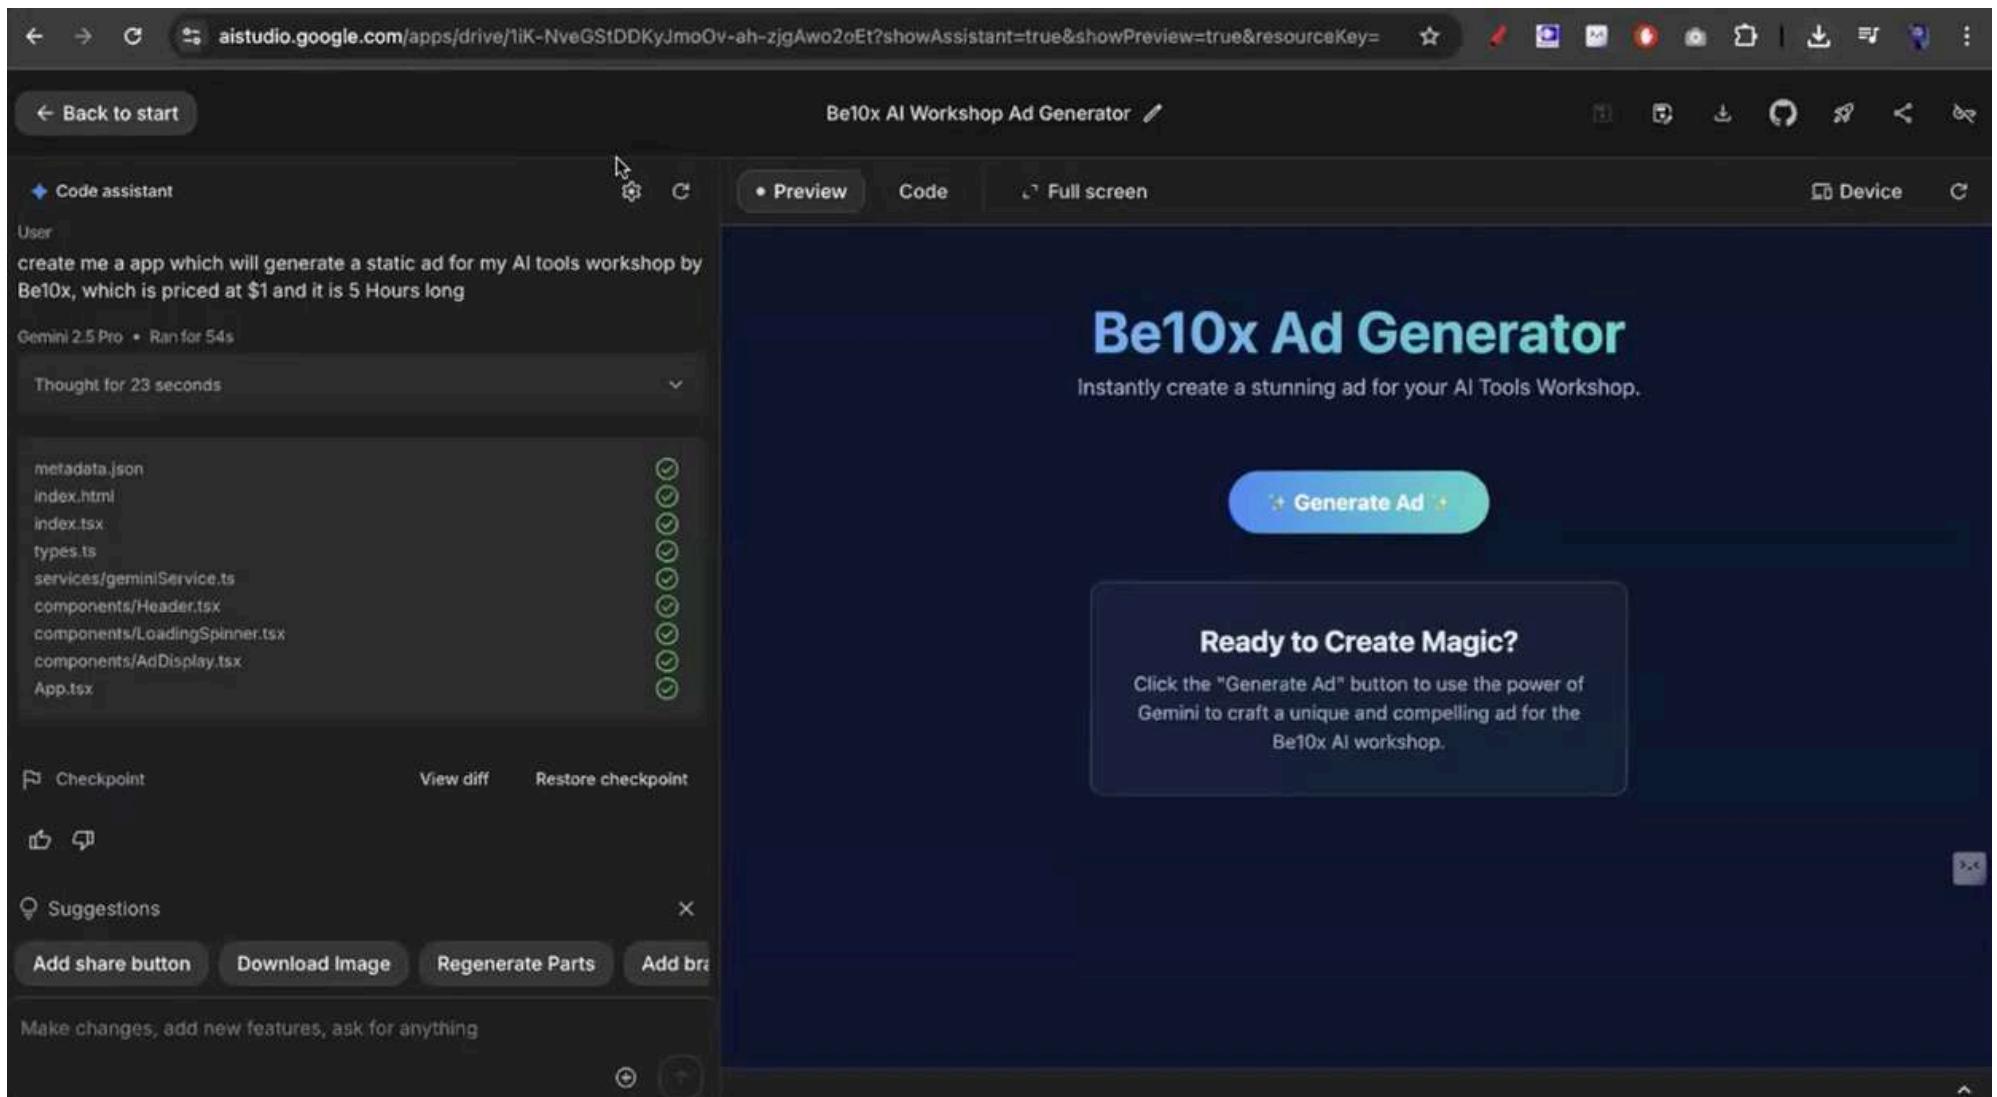

Irish Fishing Spots Website (with Gemini API)

```
280 <script>
281     storyIdeaOutput.textContent = '';
282 
283     modal.style.display = 'block';
284     document.body.style.overflow = 'hidden';
285 }
286 
287 function closeModel() {
288     modal.style.display = "none";
289     document.body.style.overflow = 'auto';
290     currentSpot = null; // Clear current spot
291 }
292 
293 // --- Gemini API Integration ---
294 const apiKey = ""; // Keep empty as per instructions
295 
296 async function callGeminiAPI(prompt) {
297     const apiUrl = 'https://generativelanguage.googleapis.com/v1beta/models/gemini-2.0-flash:generateContent?key=${apiKey}';
298     const payload = {
299         contents: [{ role: "user", parts: [{ text: prompt }] }]
300     };
301 
302     try {
303         const response = await fetch(apiUrl, {
304             method: 'POST',
305             headers: { 'Content-Type': 'application/json' },
306             body: JSON.stringify(payload)
307         });
308         if (!response.ok) {
309             const errorBody = await response.text();
310             console.error("API Error Response:", errorBody);
311             throw new Error(`API request failed with status ${response.status}: ${errorBody}`);
312         }
313         const result = await response.json();
314         if (result.candidates && result.candidates.length > 0 &&
315             result.candidates[0].content && result.candidates[0].content.parts &&
316             result.candidates[0].content.parts.length > 0) {
317             return result.candidates[0].content.parts[0].text;
318         }
319     } catch (error) {
320         console.error('Error calling Gemini API:', error);
321     }
322 }
```

# SO FAR, WE HAVE GONE FROM ZERO KNOWLEDGE IN AI TO...

The screenshot shows a web browser window with a dark theme. The title bar reads "chatgpt.com/g/g-67b866a648a88191b29e8274026994fd-be10x-ats-resume-generator/c/67f7e01c-cd24-8003...". The main content area is titled "Be10x - ATS Resume Generator". Below this, a section titled "Step 1: ATS Score Analysis (Before Optimization)" provides a breakdown of ATS relevance. A table lists various categories and their match status:

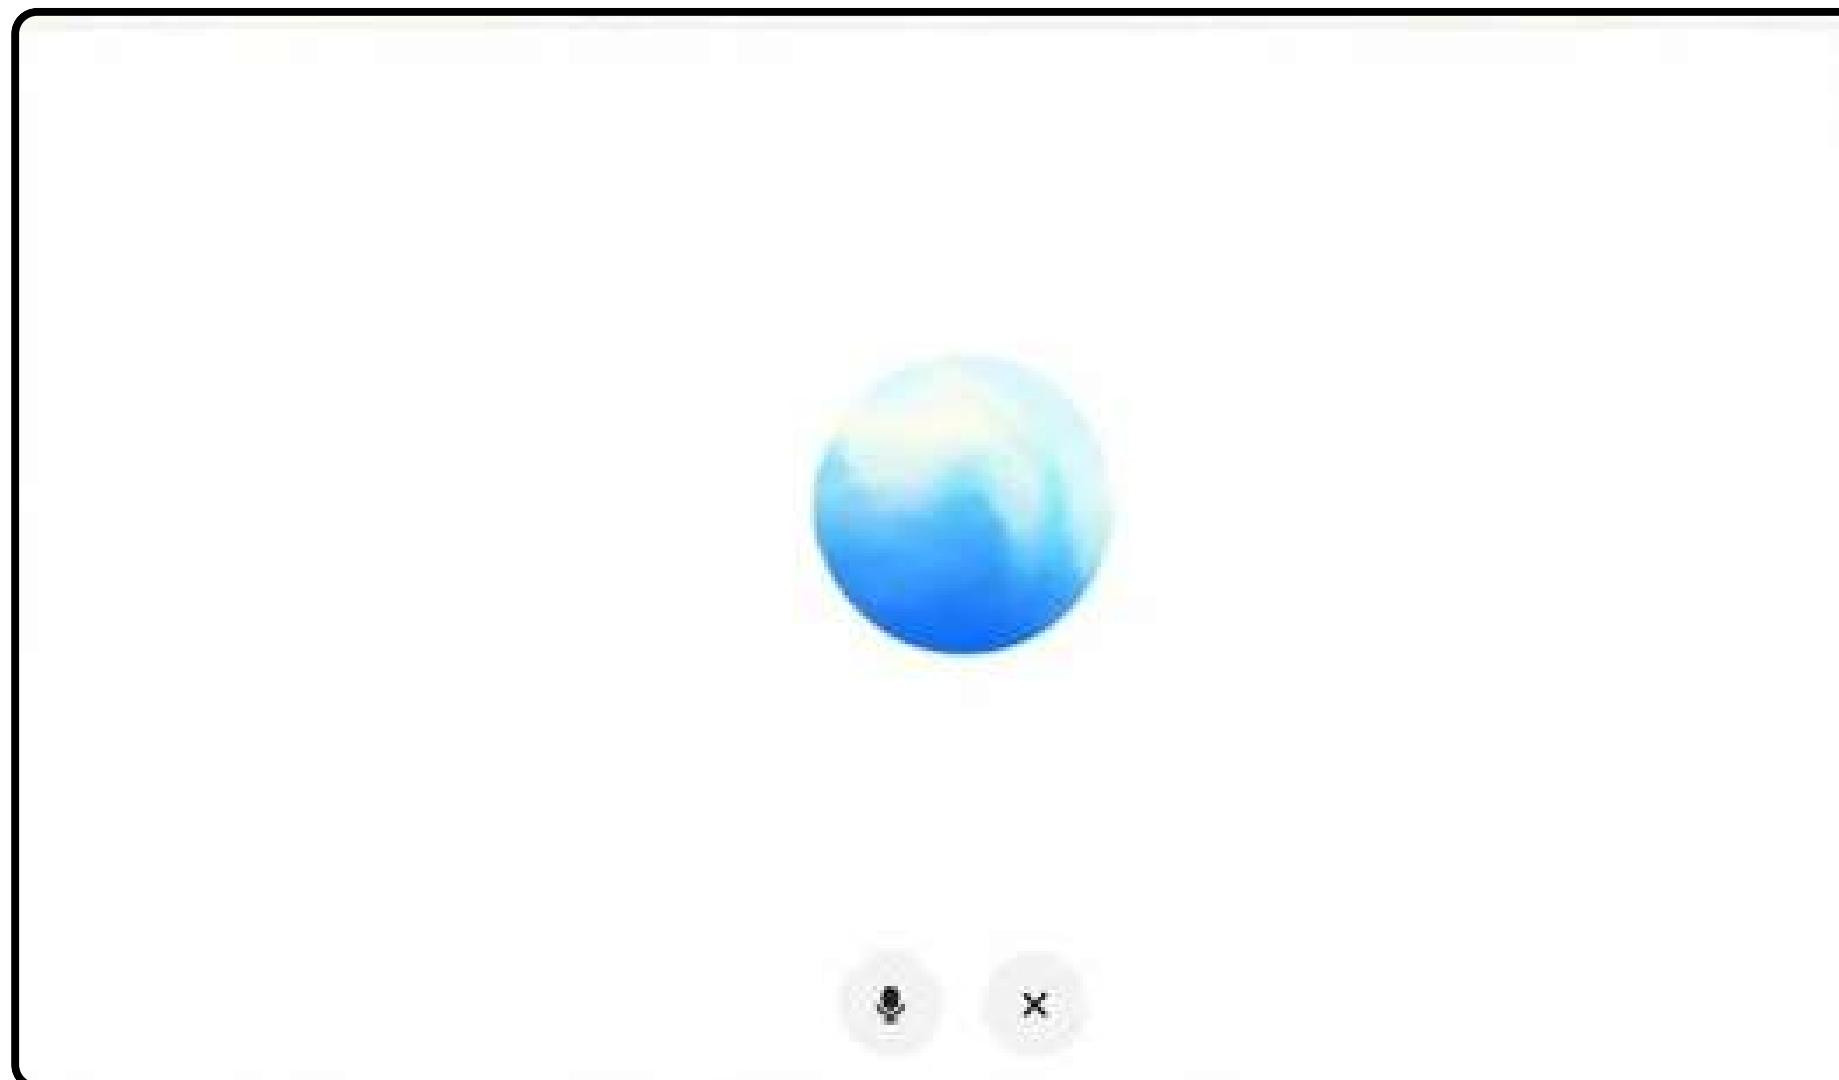

Category	Match
Mathematics domain knowledge	✗ Not mentioned explicitly
AI/ML experience	✓ Strong match
Writing/communication skills	✓ Mentioned briefly
Experience in assessing AI output	✗ Not mentioned
Clear explanation of math topics	✗ Not included
Related education	✓ (B.Tech in CS – adjacent field)
Freelance/remote adaptability	✗ Not covered

At the bottom, there is a button labeled "Ask anything" with a plus sign.
