Certificates

Cybersecurity Job Simulation

I completed the Cybersecurity Job Simulation from Forage in October 2024, gaining practical skills in threat detection, incident response, and vulnerability assessment. This simulation reinforced my educational foundation in cybersecurity principles and further developed my analytical and problem-solving abilities within a simulated professional environment.

Advanced Software Engineering Job Simulation

I completed the Advanced Software Engineering Job Simulation, demonstrating my proficiency in software design, coding, and debugging. This simulation sharpened my problem-solving and teamwork skills, aligning with my educational foundation in computer science and preparing me for real-world software development roles.

Banking Application

Cisco Cybersecurity Essentials

Cisco Cybersecurity Essentials certified. Possesses foundational knowledge in cybersecurity principles, threat analysis, and security tools. Skilled in network security and incident response.

Azure AI 900

Azure AI Fundamentals (AI-900) Certified Demonstrates foundational knowledge of Azure AI services and concepts. Understands how to build and deploy AI solutions on Azure, including machine learning, computer vision, and natural language processing. Familiar with responsible AI principles and best practices.

Profile

A highly motivated Engineering student pursuing an MCA degree specializing in Computer Science, set to graduate in 2026. Eager to leverage my academic foundation and burgeoning skills to contribute to innovative projects. Committed to continuous learning and professional development, seeking opportunities to apply and expand my technical expertise within the industry.

Work Experience

Web Developer

🏢 IT Services

📅 Dec 2025 - Present

Web Developer Intern, Leometric Technology.IT Solutions Pvt Ltd. Dec 2025 – Present Worked on front-end and back-end development using HTML, CSS, JavaScript, PHP, Laravel, and MySQL. Built responsive pages, handled database operations, and supported live project development.

Full Stack Developer

🏢 SETTribe IT Solutions

📅 Jun 2025 - Oct 2025

Full Stack Developer Intern, Set Tribe IT Solutions Pvt Ltd. June 2025 – Oct 2025 Pune, Maharashtra Built and maintained full-stack web modules, improving load speed by 15–20%. Collaborated with the development team to deliver features on time, increasing workflow efficiency by 10–15%. Identified and resolved bugs, reducing system errors by 15–20%. Optimized code and database queries, enhancing performance by 10–15%.

Software Developer

🏢 Code Clause

📅 Mar 2024 - May 2024

Front-End Developer

🏢 Bharat Intern

📅 Jan 2024 - Mar 2024

Education

MCA Computer Application

🏢 Dnyansagar Institute of Management and Research (DIMR), Pune, Maharashtra

📅 2024 - 2026 • Post Graduation • Computer

I hold a Master of Computer Applications (MCA) degree in Software Engineering from Dnyansagar Institute of Management and Research (DIMR), Pune, Maharashtra. My postgraduate studies, spanning two years, equipped me with a strong foundation in software development principles and practices. This program has provided me with the necessary skills to excel in the field.

BCA Computer Application

🏢 Savitribai phule University pune

📅 2021 - 2023 • Graduation • Computer Application

Completed a Bachelor of Computer Applications (BCA) degree from Savitribai Phule University, Pune, with a specialization in Computer Applications. Enrolled in 2021 and expected to graduate in 2023. Completed a Bachelor's degree in BCA in 2023.

-

🏢 Prerana Madhyamik Vidyalaya, Thergaon, Pune

📅 2018 - 2020 • Intermediate • Commerce

-

🏢 Yashwant Vidhyalay High School

📅 2017 - 2018 • High School

Projects

E-Commerce Application

I designed and developed a full-time e-commerce application during my MCA studies to address the growing demand for online retail. As the lead developer, I utilized Python, Django, and React to create a scalable platform. This resulted in a 20% increase in user engagement and successful deployment within the academic year.

Banking Application

Developed a banking application to streamline financial transactions for students. Led a team to design and implement core features like balance inquiries and fund transfers, utilizing Java and SQL. Successfully reduced transaction processing time by 15% and improved user engagement within the university's financial ecosystem.

Online Grocery Management Application

Developed an online grocery management application to streamline inventory and automate ordering processes. As a full-time project, I designed and implemented core features, utilizing Java and SQL. My role involved managing the database and optimizing application performance, leading to a 20% reduction in order fulfillment time.

Sair Karo TravelBooking Application

Sair Karo is a complete online travel management and ticket booking system, allowing customers to book tickets for trains, buses, and planes with an intuitive interface. This project was created as a full-featured web application in PHP with MySQL.
